

TAIPOL[®] BR

Grade	Polymerization System	Configuration	Package
BR 0150L	Solution Polymerization	96% cis minimum	30bale / box, 35kg / bale
	<p>Characteristics: High degree of linearity. High abrasion resistance, low heat build-up, high resilience, good extrusion properties..</p> <p>Application: Tire, hose, footwear, belt, golf ball, bouncing ball and various industrial products.</p>		
BR 0150	Solution Polymerization	96% cis minimum	30bale / box, 35kg / bale
	<p>Characteristics: High abrasion resistance, low heat build-up, high resilience, good low temperature properties and excellent hysteresis.</p> <p>Application: Tire, hose, footwear, belt, golf ball, rubberized cloth and various industrial products.</p>		
BR 0150H	Solution Polymerization	96% cis minimum	30bale/box, 35kg/bale
	<p>Characteristics: Short dissolving time, Low solution viscosity, Free from gel, Excellent gloss for finished products, Superior low temperature properties</p> <p>Application: High-impact polystyrene</p>
