# Letter to the Shareholders

TSRC delivered outstanding performance in 2021 and continued to ensure the health and safety of our employees as our outmost priority during the pandemic. Despite the challenges imposed by port congestions, supply chain disruptions, coronavirus transmission, and Dual Control Policy in mainland China, TSRC achieved record revenue & profit in the past decade by leveraging favorable market dynamics, such as downstream demand recovery, widening price spread between natural rubber and butadiene and strained synthetic rubber supply, and responding to the rapid market changes with operation resilience and close customer collaboration. In terms of equity investments, Indian Synthetic Rubber Private Limited and ARLANXEO-TSRC (Nantong) Chemical Industrial Co., Ltd. also delivered strong profit growth, reflecting the market recovery in India and China.

In 2021, the sales volume was 545 thousand metric tons, an increase of 3% versus 2020. Consolidated revenue was NTD 32,533 million, an increase of 35% compared to NTD 24,024 million in 2020. Gross profit grew 132% to NTD 6,800 million and gross margin was 21%. Operating profit was NTD 3,928 million, an increase of 378% from 2020, and operating profit margin was 12%. As a result, 2021 net income was NTD 3,931 million, inclusive of a one-time land disposal gain of NTD 910 million, and with an EPS (earnings per share) of NTD 4.76.

Staying on course to become a global specialty chemical enterprise, TSRC continues to advance its strategic growth projects, such as increasing the commercial sales volume of solution styrene-butadiene rubber (SSBR) products to global tire brands for advanced green tires and gaining customer qualification for specialty hydrogenated styrenic block copolymer (HSBC) for medical application. In the area of R&D innovation, TSRC had 16 patents granted in 2021. TSRC established its second global R&D center in Texas USA, also its first R&D center outside Taiwan, to accelerate application development and product commercialization of specialty chemical polymers via an expanded international footprint.

Moving into 2022, the International Monetary Fund (IMF) downgraded the global economic growth forecast to 4.4% from 5.9% in 2021 and projected a moderate market growth. The economic outlook is expected to be impacted by challenges from inflation, supply disruptions, trade and geopolitical conflicts, and new coronavirus variants. TSRC plans to continue driving business growth momentum with effective sales and operation planning (S&OP) and business execution. In addition, significant resources and execution focus will be dedicated to key investment projects, such as the Shenhua relocation project, to strengthen our competitive advantages and leading market position. In advancing the Environmental, Social and Governance (ESG) initiative, TSRC will establish corporate targets in key areas including carbon emission reduction, renewable energy adoption, and water resource recycling, as well as detailed action plans to fulfill TSRC' s mission in sustainability and steadfast commitment to transformation.

Chairman: Nita Ing

II. Company history

# 2020's High-Value Transformation and Sustainable Operation

- Establishment of the Global R&D Center in Texas, the U.S.A.
- Relocation and plant expansion of Shen Hua Chemical and ARLANXEO-TSRC

#### 2000's Expansion of Production Lines

- Successfully developed the second generation SEBS technology.
- Established Compound plants in Songjian, Shanghai and Jinan, Shandong, respectively.
- Established an SEBS plants with an annual output of 20 thousand metric tons and formed a joint venture-BR plant with an annual output of 50 thousand metric tons respectively in Nantong, Jiangsu, China.

#### 1980's Early Growing Stage

- Established a BR plant with an annual output of 40 thousand metric tons.
- Relocated the Philips SBS Plant from Texas, USA to Kaohsiung.

# 2010's Globalization

- Signed an SBS technology licensing contract with a Russian Company, which was the first technology out-licensing by TSRC.
- Established a joint venture E-SBR plant with an annual output of 120 thousand metric tons in India and a joint venture NBR plant in Nantong, Jiangsu, China.
- Acquired Dexco in the U.S.
- Established a SIS plant with an annual output of 25 thousand metric tons in Nantong, Jiangsu, China.
- Expanded the production line for Advanced Shoe Materials in Gangshan.
- Upgraded the Technology Center and Semi-commercial Plant in Kaohsiung, Taiwan.
- Raised stake in Indian joint venture (Indian Synthetic Rubber Private Ltd.) to 50%
- Completed construction of new SEBS line in Nantong, China.
- Incorporated Vietnam subsidiary. Completed construction of ASM plant in Vietnam.
- Established TSRC Global Application Research Center in Shanghai, China.

#### 1990's Rapid Regional Expansion

- Established its second SBS production line in Kaohsiung.
- Established Shen Hua Chemical Industrial in Nantong, Jiangsu, China and established an E-SBR plant with an annual output of 100 thousand metric tons. This Company is the first joint venture and overseas Company of TSRC.
- Participated in a joint venture project of BR with an annual output of 50 thousand metric tons in Thailand.
- Successfully developed the first generation of SEBS technology.

#### 1970's Beginning

- Taiwan Synthetic Rubber Corp. (TSRC) was established in 1973.
- Established an E-SBR plant with an annual output of 100 thousand metric tons (the first E-SBR plant in Taiwan).

#### Board Diversity

The Company introduces the idea of diversity in its "Corporate Governance Best Practice Principles." Members of the Board shall possess knowledge, experiences, and abilities required for the execution of their duties; furthermore, the composition of the Board shall possess diversity and comply with laws and regulations, with reference to the characteristic, operations, market, and future development requirements of the Company. The Board shall, in general, possess the abilities of making business judgments, accounting and financial analysis, business management, emergency management, as well as industrial knowledge, and leadership, decision-making capacity, and international vision required for cross-nation operations.

The Board of the Company comprises seven Directors, including one female Director (accounting for 14%) and three Independent Directors (accounting for 43%);two of the Independent Directors have been re-appointed for two sessions, and one of the Independent Directors have been re-appointed for three sessions; however, as the Independent Director possesses extensive financial backgrounds and industrial experiences that are significantly beneficial for the future business development of the Company. In addition, there is no Director who is concurrently a managerial officer of the Company.

Members of the Board are from different fields of expertise, used to be the senior management in international enterprises, and possess knowledge, skills, leadership and decision-making capacity, and international market vision; abilities of members of the Board, in general, comply with the diversity policy and the requirements of the Company' s future business development; relevant implementation status is as follows:

| Diversity Item                      | Term of<br>Office as An<br>Independent<br>Director |              | t                          | Industrial Experiences and Abilities |         |               |   |                                   |                            |                                       |  |   |              |  |

2. The current and most recent year's objectives and implementation status for enhancing the Board of Directors' functions:

- (1) The Board of the Company convenes meetings and performs discussions and resolution-making according to the Company Act and the Securities Exchange Act, as well as standards announced by the competent authority. To reinforce the functions of the Company' s Board and improve the supervising function, the Company established its Audit Committee and Remuneration Committee according to laws and regulations; functional committees assist the Board in reinforcing corporate governance and supervisory duties based on their function.
- (2) To continue improving the functions of the Board and the operation of corporate governance, the Board approved the "Corporate Governance Best Practice Principles," "Ethical Corporate Management Best Practice Principles," "Risk Management Policy," and "Regulations for Conflicts of Interests Management" in 2021, and the Company has duly observed such regulations.
- (3) Article 21 of the Company's "Corporate Governance Best Practice Principles" states the idea of Board diversity, where members of the Board shall possess knowledge, experiences, and abilities required for the execution of their duties with reference to the business characteristics, operations, and future development requirements of the Company; for the policy related to the abilities of all Board members in compliance with diversity and the requirements of the Company's future development, please refer to "Board Diversity" on page 13 of the annual report.
- (4) Based on the "Self-Evaluation or Peer Evaluation of the Board of Directors," the Company carried out the evaluations of the Board, functional committees, and individual Board members at the beginning of 2022 to enhance the functions of the Board by adopting opinions and recommendations provided by Directors as the basis for examination and improvement; the results of such evaluations were submitted to the Board for report.
- (5) The Company set up its Corporate Governance Officer for relevant corporate governance affairs according to the requirements in 2021.

Practice Principles for TWSE/TPEx-Listed Companies, describe the implementation status and the deviation from the Principles: The Company has established its ESG strategies and management policies according to the "Sustainable Development Best Practice Principles for TWSE/TPEx-Listed Companies" and actual operating requirements, and makes execution accordingly. For the operation of sustainable development, there is no deviation from the "Sustainable Development Best Prac-TPEx-Listed Companies."

- VII. Other important information that is helpful to understand the implementation status of promoting sustainable development:
   1. In response to the increasing attention attached to the ESG performances of TSRC by the international capital market and
  - In response to the increasing attention attached to the ESG performances of TSRC by the international capital market and stakeholders, and under the effect of global climate change, net zero emission has become the final goal of countries and enterprises. Meanwhile, in response to the implication of promoting the sustainable development of the listed companies and the amendments to the "Sustainable Development Best Practice Principles for TWSE/TPEx-Listed Companies" by the FSC, the Company established its ESG strategies to serve as the long-term promotional policies in terms of environment, social, and governance.
  - 2. The Company's ESG strategies primarily focus on three aspects of environment, social, and governance; the purpose of such strategies is to allow the stable and continual operation and development of the Company through the establishment of short-term, mid-term, and long-term targets. Through the ESG strategies, we continued to implement governance for the governance aspect; in combination with the long-term strategies and operating plans, we reinforced our operating performances and built our operating resistance. For the environment aspect, we set active carbon dioxide reduction targets, increased the using ratio of renewable energy, wastewater recycling ratio, and using ratio of reuse water. For the social aspect, we continued cultivating sustainability talents, reinforced the health and safety environment for employees, increased employees' happiness, and increased our social participation. By doing so, we allow stakeholders to understand the investments and efforts made by the Company in different ESG aspect, and in turn, secure their support and improve the competitive strength of the Company's products in the market. Moreover, through our ESG performance achievements, we obtained favorable ratings from domestic and overseas rating institutions (i.e., MSCI, EcoVadis, CDP, and Corporate Governance Evaluation). Apart from improving our business growth, we also brought positive contributions to the environment and society.

2. The Company continues to reinforce its corporate governance operations; for the investor relations section on the corporate website, the Company established relevant rules for corporate governance and provide material resolutions made by the Board for investors' reference.

#### 3. Procedures for handling material inside information

The Company has implemented "Procedures for handling materials inside information" to establish a sound mechanism for the handling and disclosure of material inside information. The Procedures have been announced and made accessible internally, and apply to all directors, supervisors, managerial officers, and employees of the Company, and any other person who acquires knowledge of the Company's material inside information due to their position, profession, or relationship of control. The Company has also conducted educational campaigns or training programs to promote the awareness of these procedures and relevant laws and regulations.

#### <9> Implementation of the Company's internal control system

1. A statement of Internal Control

# TSRC Corporation A statement of Internal Control

Date: March 10, 2022

In accordance with the result of self-evaluation of the internal control system in 2021, the Company hereby declares as follows:

- The Company acknowledges and understands that the establishment, implementation and maintenance of the internal control system are the responsibility of the Board of Directors and managerial officers, and that the Company has already established such a system. The purpose is to provide reasonable assurance regarding the achievement of objectives such as the effectiveness and efficiency of business operations (including profitability, performance, and security of assets), reliability, timeliness, transparency, and regulatory compliance of reporting, and compliance with applicable laws, regulations, and by laws.
- 2. There is limitation inherent to internal control system, no matter how perfect the design is. As such, effective internal control system may only reasonably ensure the achievement of the aforementioned goals Further, the operation environment and situation may vary, and hence the effectiveness of the internal controls system. The internal control system of the Company features the self-monitoring mechanism. Once identified, any shortcomings will be corrected immediately.
- 3. The Company judges the effectiveness of the internal control system in design and enforcement in accordance with the "Criteria for the Establishment of Internal Control System of Public Offering Companies" (hereinafter referred to as "the Criteria") promulgated by the Securities and Futures Commission of the Ministry of Finance. The Criteria is instituted for judging the effectiveness of the design and enforcement of internal control system. There are five components of effective internal control as specified in the Criteria with which the procedure for effective internal control is composed by five elements, namely, 1. Control Environment 2. Risk Evaluation 3. Control Operation 4. Information and Communication and 5. Monitoring. Each of the elements in turn contains certain audit items, and shall be referred to the Criteria for detail.
- 4. The Company has adopted the above criteria for the internal control system to assess the effectiveness of the design and operation of its internal control system.
- 5. In accordance with the aforesaid evaluation result, the Company believes that the internal control system as of December 31, 2021 (supervision and management over subsidiaries), including understanding the effect of operation, the attainment rate and report of the efficiency goal are reliable, timely, and transparent, and the design and implementation of the internal control system are in compliance with the regulations and effective and reasonably ensure the attainment of the aforesaid goals.
- 6. This statement of declaration shall form an integral part of the annual report and prospectus on the Company and will be announced. If there is any fraud, concealment and illegal practice discovered in the content of the aforementioned information, the Company shall be liable to legal consequences under Article 20, Article 32, Article 171 and Article 174 of the Securities and Exchanges Act.
- 7. This statement of declaration has been approved by the Board on March 10, 2022 with presence of 7 directors at unanimous consent.

**TSRC** Corporation

Chairman: Nita Ing

CEO: Joseph Chai

2. Hiring CPA to carry on a special audit of the internal control system: No

#### <6> Company Dividend Policy and Implementation

1. Dividend policy

The synthetic rubber industry that the Company participates in is a mature industry, and the Company is striving towards globalization and diversification in products and applications. To comply with the Company's long-term plans and to ensure sustainable growth, the Company has established the following dividend policies: After the annual fiscal closing, the Company shall, after losses are covered, all taxes and dues paid, first set aside ten percent of such profits as legal or special reserve. The remaining earnings after adjustment, the beginning retained earnings, are the distributable earnings to be distributed by a resolution proposed by the board of directors and adopted by the shareholders' meeting. Cash dividends may be distributed by a resolution adopted by a majority vote of a meeting of the board of directors attended by two-thirds or more of all the directors. The board's resolution should be reported to the shareholders meeting.

If the Company allocates dividends for shareholders, the cash dividend shall exceed twenty percent of the total allocated amount.

- 2. Distribution of dividends scheduled at the shareholders' annual meeting Cash dividends to be distributed are NTD 2.4 per share.
- <7> Effect upon business performance and EPS of stock dividend distribution plans drafted at the shareholders' annual meeting:Not applicable.

#### <8> Employees' compensation and directors' remuneration

- In accordance with the Article 28-1 of the Company's articles of incorporation, if there is profit for the year, the Company should contribute more than 1% of its profit as employees' compensation, and less than 1% as directors remuneration. The related regulations on distribution of employees' compensation and directors' remuneration were approved by the board of directors.
- 2. The amount of the employee's compensation in 2021 is estimated at a certain ratio according to the profit and loss of the current year. The remuneration of the director is accounted for by the expected amount. If there is a discrepancy between the above-estimated amount and the actual issued amount, it will be treated according to the changes in accounting estimates and recorded in the year of issuance.
- 3. Board of Director Resolutions on Compensations:
  - (1) According to the resolution made at the 5<sup>th</sup> meeting of the 17<sup>th</sup> Board, the employees' remuneration in cash for 2021 is NT\$171,609 thousand; according to the resolution made at the 6<sup>th</sup> meeting of the 17<sup>th</sup> Board, the Directors' remuneration for 2021 is NT\$22,677 thousand; the amounts are in line with the estimated amounts during the year of recognition.
  - (2) The Company does not distribute employees' remuneration in stock before 2021.
- 4. The actual distribution of the remunerations of employees, Directors, and supervisors for the preceding year: In 2020, the Company distributed remunerations of employees in cash of NT\$40,750 thousand and remunerations of Directors in cash of NT\$616 thousand; the amounts are in line with the estimated amounts during the year of recognition.

# I. Business overview

#### <1> Business Scope

1. Major business and product lines:

The business focuses on developing, manufacturing and selling various synthetic materials, including: (1) Synthetic rubber and elastomers: E-SBR, S-SBR, BR and TPE

(2) Applied Materials

2. Product Portfolio

| ltems                           | Revenue in 2021 | Total Turnover(%) |
|---------------------------------|-----------------|-------------------|
| Synthetic rubber and elastomers | 31,440,852      | 96.64             |
| Applied materials               | 1,092,386       | 3.36              |
| Total                           | 32,533,238      | 100.00            |

3. Planned Developments of New Products

Continue to develop microstructure control technology for the next generation S-SBR products used in eco-friendly, high performance EV tires.

2 Con

Continue research into BR platform, expand product applications, fulfill customer demands for shoe materials and plastic modifications, and increase product performance.

Unit: thousand NTD

Develop differentiated HSBC products such as high-end medical grade materials, hygiene product materials, lubricant viscosity modifiers, and other TPE products with high added-value.

Develop functional film for medical and electronic products to satisfy different customers' needs.

# <2> Industry Overview:

#### 1. Global Economic Environment

According to the forecast made by the OECD and the IMF at the end of 2021, the economic growth rate in 2022 would be 4.5% and 4.9%, respectively. Due to the slowdown of the growth in market demand and the exiting of supportive financial and monetary policies worldwide, the global economic growth rate will record a downturn as compared with the preceding year, and inconsistent restoration of development occurred to different economies. With central banks of major economies making adjustments to their monetary policies, global supply chains encounter the bottleneck and inflation, intensified geopolitics, and the variation of COVID-19, such factors will determine the development in the global market.

Since the beginning of the pandemic, the U.S.A. has been adopting easy monetary policies to stabilize the economic impacts brought by the outbreak; however, the scale of the Fed's balance sheet exceeded US\$8.7 trillion at of the beginning of 2022. With the exit of the QE policy in the U.S.A., the market generally expects that the Fed will announce the increase in interest rates in 2022. BoE has become the first among the G7 central banks to increase the interest rate at the end of 2021 to cope with the inflation. However, ECB maintained its easy monetary policies, and the financial expenditures in the Euro region remained high to continue supporting its economic growth. Mainland China made a downward adjustment to the reserve requirement ratio of financial institutions at the end of 2021, which was deemed as a signal that the government will continue adopting the eased financial and monetary policies by the market; however, attentions shall be attached to the effects of the Chinese government adopting zero tolerance policy on the economy. Looking into 2022, the economy and overall development in Taiwan will continue thriving; however, as the base period for comparison is slightly higher, the expected economic growth slowed down. According to the latest forecast issued by the Taiwan Institute of Economic Research in November 2021, the GDP growth rate in 2022 will be 4.1%, lower than 6.1% in 2021.

In 2021, the global oil price increased over 50% from the end of 2020. OPEC estimated that the oil price will continue to rise in 2022; the shortage of energy supply, the increasingly explicit energy transition policies and measures related to carbon emissions payment rolled out by countries are expected to keep the energy price up in the short term,

#### **Overview of financial status**

Review and analysis of the Company's financial position and financial performance, and risk management

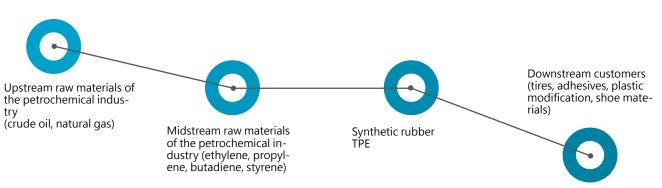

Special items to be included

#### Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities intensifying the concerns for inflation in different regions. As the turbulent geopolitics affecting the regional energy prices and the stability of supply, other events, such as the RCEP became effective in 2022, the intensified military conflicts between NATO and Russia, and the continual US-China trade war, and changes in the international situation will potentially affect the development of the global economy.

On the COP26 at the end of 2021, there were over 40 countries executed the carbon dioxide reduction agreement. The low-carbon economy transition worldwide in response to the threat of climate change has become an irreversible trend. Meanwhile, due to the ESG investing the grew rapidly since 2020 and the improvement in consumers' environmental protection awareness, enterprises commit to reducing the impacts of their operating activities on the environment and increasing the investments in products or service innovation related to the green economy and circular economy. In terms of mid-to-long-term development, national policies, market trends, and social participations will continue to promote the ESG development, which will also bring new opportunities and challenges to enterprises.

2. Relevance of the industry's upstream, midstream and downstream:

Upstream raw materials of the industry are crude oil and natural gas. Midstream raw materials refer to raw materials produced by cracking "petrochemical primary raw materials" e.g. naphtha, followed by reactions such as polymerization, oxidation, and synthetization. The downstream of petrochemical industry processes midstream raw materials to produce plastics, chemical fibers, rubbers, and other chemical products such as tires, plastic modification, adhesives, shoe materials and other industrial goods.

3. Current Industry Status and Outlook:

The demand for the global automobile industry recovered rapidly in 2021, bringing about the strong market growth. Even though affected by the shortage of automotive chips in the second half of the year, LMC estimated that the global sales of automobile would be approximately 81.94 million vehicles, representing a growth rate of 5.4% as compared to 2020. The Chinese market recovered relatively earlier than other regions worldwide. According to the China Association of Automobile Manufacturers, it is estimated that the sales of automobiles in China in 2021 will be approximately 26.28 million vehicles, representing a growth rate of 3.8% as compared to the sales volume in 2020.

Benefiting from the rapid recovery of demands, the demand for synthetic rubber grew by approximately 7% worldwide in 2021. The exit of partial suppliers and the congestion of the global transportation supply chain resulted in the short supply of synthetic rubber, giving rise to the requirements of customers in local supply. Through the pre-emptive preparedness through production scheduling and logistic plans, and adjustment of production line across regions, TSRC managed to stable supply under the strained supply chain, and worked closely with customers in terms of supply, technical services, transportation, and cost management, further reinforcing its competitive strength.

Looking into 2022, even though the economic recovery pace is slower than 2021, the markets generally maintain positive, and the strained supply chain would slightly be relieved. However, the freight is unlikely to return to the level before the epidemic. Inflation, increasingly stringent environmental safety and health regulations, and the increase in the carbon dioxide emission costs will intensify challenges faced by enterprises.

For the application of synthetic rubber, the demand for tires in 2022 will maintain its growth in accordance with the global car demand; it is expected that the market will continue to grow. For the synthetic rubber business, the Company will continue developing green energy-saving tire materials and expand non-tire applications to strengthen its core competitive strength. Sufficient new production capacities will continue to be released for the TPE industry; in particular, there will be more "refining-chemical integrated" petroleum businesses purchasing downstream auxiliary devices for commercial operations in the following three to five years in Mainland China; it is expected that the supply will increase significantly, and the space for profitability will shrink. Developing high-value products, improving market competitive strength, and grasping changes and new opportunities brought by ESG (environment, social, and governance) and the green economy will be the challenges to test companies' decision-making, judgement, and operational execution capacities

| Item   | Result  |
|--|---|
| Special film application                           | • We developed a series of formulas with features comparable with leading companies; we commenced the commercial operations for partial formulas one after another, and such formulas are being certified by global leading companies.  |
| Blending materials for special applications        | • Developed generation 1 and generation 2 shoe materials, which were recog-<br>nized by the international brands and commercialized.  |
| Development of top-notch pro-<br>cess technologies | <ul> <li>Completed the design of the new reactor and upgraded the technologies comprehensively. Meanwhile, we achieved more favorable production and energy-saving efficiency; in the future, such features will be introduced to the building design of new plants.</li> <li>Completed the reformation of small-scale commercialized plants and improved the product quality and stability.</li> </ul> |

#### <4> Long-Term and Short-Term Business Development Plans

To realize High-Value transformation and in response to the increasing global awareness of ESG, the Company's major R&D direction will focus on developing new products and new technologies with high added-values by using advanced environmental protection process, to allow products and services of the Company to gain customers' satisfaction and solve all issues of customers arising from the use of rubber, creating the niche for mutual benefits. The substantial development plan includes:

- 1. Long-term plan:
- (1) Continue reinforcing the technology platform and customer development and establish differentiated competitive strength; combine the development of downstream industries and customers' requirements to develop application products with high added-values, including EV tire materials, high-end shoe materials, medical grade TPE, protection films, and elastic non-woven fabric, so as to improve the diversity of our product profile and enter the new segregation market for application.
- (2) Target key end-market applications and collaborate with customers' R&D teams to jointly develop high-value innovative products, serving as a total solution provider for the customers.
- (3) Upgrade manufacturing equipment and the utilization of raw materials to improve production efficiency and optimize production costs.
- (4) Continue examining synthetic rubber market dynamics and customer needs while exploring opportunities in new products, market, and applications, and evaluate opportunities of upstream and downstream strategic alliances.
- (5) Offer local supply and customer services for target market industries and supply chain in order to strengthen TSRC' s market position and expand customer base.
- (6) Expand our global layout and accelerate the development and product commercialization of specialty chemical applications through the newly established Global R&D Center in Texas, the U.S.A.
- (7) Evaluate the possibility of using bio-feeds, dissoluble packaging materials, and other environmental-friendly materials in product process and increase the use ratio of renewable energy and the recycle ratio of water.
- (8) Continue the technical exchanges and collaboration with academia and customers to enhance product value or conduct commissioned research under contracts with academia to improve process technology.
- 2. Short-Term Plan:
  - (1) As countries, including the EU, Japan, and China, have promoted the environmental tire label one after another, we formed the S-SBR project R&D team to continue focusing on developing and promoting the S-SBR market with low rolling resistance and wet grip feature; meanwhile, we will reinforce S-SBR and other special synthetic rubber product profiles to respond to the carbon dioxide reduction requirements of customers, securing the recognition from major tire customers and increasing our market share.
  - (2) Improve the non-tire applications (i.e., shoe industry) and HIPS sales proportion to diverse market risks and increase profits.
  - (3) Comply with the environmental regulations in China and continue to satisfy the requirements of local markets. The production base of Shen Hua will relocate and the expansion of production capacity will be performed; we will continue focusing on the Chinese market and improve our competitiveness.
  - (4) Strengthen the Company' s market positioning by utilizing the production capacity of the Vietnam Plant and its geographical advantages and enter new regions, including India and Southeast Asia for development; continue expanding our customer base to improve the supply chain benefits.
  - (5) Improve the level of production processing for customers and the product value chains through stable quality, close cooperation with customers, supply of High-Value products, and market segregation.

# II. Market overview and production/sales analysis

### <1> Market Analysis

1. Major sales destinations

| Name of product                      | 20           | Exported territories            |  |  |  |  |
|--------------------------------------|--------------|---------------------------------|--|--|--|--|
| Name of product                      | Sales volume | Exported territori Sales amount |  |  |  |  |
| Synthetic rubber and elasto-<br>mers | 535,238      | 31,440,852                      | China, U.S.A., Thailand, Viet-<br>nam, Germany, Turkey, Japan, |  |  |  |
| Applied materials                    | 9,887        | 1,092,386                       | China, Southeast Asia.   |  |  |  |

Unit: thousand NTD/Metric Ton

#### 2. Market share:

| Synthetic rubber and elastomers | Asia is the major market accounting for 72% of the total sales, while Americas and Eurozone ac-<br>count for 15% and 11% of total sales respectively. |  |
|---------------------------------|---|--|
| Applied<br>materials            | China is the main market accounting for 44% of total sales, followed by Vietnam and Hong Kong with 35% of the total sales.                            |  |

#### 3. Industry demand supply and market growth projection

As partial competitors' production capacities were used for other products or suspended due to the constant supply over demand in the synthetic rubber industry during recent years, the current supply-demand in the market is reaching a balanced state. In the future, it is estimated that the investment of new production capacity will be minor; together with the fact that the Asia region remains as the region with higher growth regarding the demand for automobiles and tires worldwide, it is estimated that the demand for synthetic rubber will continue to grow. The Company will improve its profitability performances through the optimization of customer and product profiles, order allocations, and production line adjustment.

The economic recovery will promote the applications of footwears, automobiles, consumables, and adhesives, and further push forward the market demand for TPE. However, TPE is still within its peak phase for production expansion, which may lead to the imbalanced demand-supply resulting from the decreasing production capacity utilization rate in the following three years, affecting the space for profits of enterprises. In terms of the long-term trend, the rapid growth in production capacity triggered the commoditization trend and facilitated the products' replacement cycle; the demand-supply relations within the market will face great challenges.

The demand for SBS will increase by 4.2% in 2022. For the supply, under the new production capacity invested by Gulei and Luhua in China and NKNK in Russia, the supply volume will increase by 125,000 MT. With the significant growth in the demand for e-commerce and water-proof applications, and the recovery of demands for adhesives, the global demand for SIS will increase by 4.1%. The supply of SIS has increased by 10,000 MT; within the newly expanded production capacity, Jinhai Chenguang and Luhua both possess the advantage of upstream and downstream integration, and it is estimated that the demand-supply competition will be further intensified. The demand for HSBC will increase by 5%; with Sinopec and Kuraray investing in new production capacity, the global supply will increase by 16,000 MT, making the competition among products with same levels more challenging. For international trade, with the intensified market competition and the technology improvement in China, the import volume of China will be reduced to a lower standard.

#### 4. Competitive positioning, future development factors and actions

E-SBR and BR are mature products that the difference among the products produced by different manufacturers is not significant, and thus the cost of raw materials is the key to profit margins. The Company does not possess upstream integration advantage, so its profitability is greatly affected by the cost of raw material, particularly butadiene. However, since there will be many new butadiene capacity additions in Asia in 2021, the difference of raw material cost between vertically integrated companies and non-vertically integrated companies will narrow, consequently helping the Company to increase sales. Moreover, to capture new sales opportunities, the Company is actively developing tire market in

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities Southeast Asia and non-tire markets, at the same time expanding its sales in India via its joint venture ISRPL. The Company has taken actions for immediate impacts and lasting benefits with the objective to increase sales and improve profitability. The Company diversifies its product portfolio and differentiates toward high-value applications to counter competition from new TPE capacity. Furthermore, the Company strengthens its capability in developing higher-end applications and enhancing profitability through the commercialization of its new advanced SEBS line and advanced shoe material production line.

#### <2> Important application and manufacturing processes of main products 1.Main product important use:

| E-SBR                | General material for car tires, soles, conveyor belts, hoses, sport facilities, toys and other industrial prod-<br>ucts.  |
|----------------------|---|
| S-SBR                | Energy-saving (low rolling resistance) tires, high-function tires, snow tires and all-season tires.   |
| BR                   | High-speed tires, soles, sport facilities, High Impact polystyrene (HIPS) and other industrial products.  |
| ТРЕ                  | Adhesives, hot-melt adhesive, plastic modification, medical firms, and other industrial products for spe-<br>cial applications.   |
| Applied<br>Materials | Advanced shoe materials, foamed shoe materials, toys, stationery, wire and cable, baby supplies, person-<br>al care, hand tools covering, materials, car industry and other industries such as refrigeration. |

#### 2.Outline of production process:

| E-SBR                | E-SBR is produced in an emulsion polymerization system. Soap is used as the reaction medium and emulsifier for the polymerization of butadiene and styrene to produce high molecular latex. After the addition of anti-oxidant and extender oil (for oil-extended rubber products), the coagulation crumb is then washed, dewatered, dried, baled and packaged. |
|----------------------|---|
| S-SBR                | S-SBR is produced in a solution polymerization system. Butadiene and styrene was polymerized to high molecule weight rubber solution via anionic initiator in organic solvent system. After the addition of an-<br>ti-oxidant and extender oil (for oil-extended rubber products), the coagulation crumb is then washed, dewatered, dried, baled and packaged.  |
| BR                   | BR is produced in a solution polymerization system. Crumb is made after polymerization of butadiene (BD), and is condensed into pallets, ash content is washed off and then dewatered and packed.   |
| TPE                  | TPE is produced in a solution polymerization system. Crumb is made after polymerization of butadiene and styrene after being steamed to recall solvent, it is dewatered, pelleting and then packed.   |
| Applied<br>Materials | TPE products and other raw materials are mixed, blended and granulated.   |

#### <3> Supply of main raw materials

The synthetic rubber produced by the Company is mainly polymerized from butadiene and styrene within the petrochemical products.

| ltem      | Main source          | Supply situation   |
|-----------|----------------------|--|
| Butadiene | Domestic,<br>imports | Domestic butadiene is primarily supplied by CPC and FPCC and imported in the case of the short supply. |
| Styrene   | Domestic             | Styrene is primarily supplied by SMCT, FCFC and GPPC   |

# V. Labor relations

- <1> Employee benefit plans, continuing education, training, retirement systems, and the status of their implementation, and measures for preserving employees' rights and interests:
  - 1. Employee benefit plans, continuing education, training, retirement systems, and the status of their implementation:

Regarding welfare measures, besides providing employees with cash gifts for the three major festivals (Dragon Boat Festival, Moon Festival, Chinese New Year), birthday and Labor day through Employee Welfare Committee, the Company also implements "cafeteria benefit", a welfare project for employees to combine the "bonus points" satisfying their own welfare demands, including travel and leisure activities, education subsidy for their children, self-selected group buying of daily supplies from employee welfare club, etc., to truly implement the actual concepts of employee welfare.

As for the insurance, besides labor and health insurance, TSRC also provides free group insurance that covers employees and their family members. As for the labor pension system, TSRC conducts the business in accordance with the Labor Standards Act and labor pension system. TSRC allocates a pension to the pension accounts of employees based on the pension actuarial report provided by actuaries every year. The gap between the estimated pension and actual pension amount for personnel who are qualified for retirement by the end of every year is allocated by March 31 of every year in accordance with the regulations, in order to protect the right of retirement of employees.

TSRC hosts large annual gatherings and galas each year for better employee relationships, gives employees cash gifts for weddings, childbirth, injuries, and allowances for disease; has one nurse for each medical room; and offers medical consultation services with physicians.

Regarding employees' training program, the training plans are set based on the Company's business policies, units' requirements, and relevant laws/regulations. The Company offers general knowledge, professional skills, and management programs for the newly recruited and existing employees. Meanwhile, the "life-time learning" goal is fulfilled through the training methods of OJT, Off-JT and SD. The total training fee in 2021 is NTD 6,593,000, in which the average training fee per person is NTD 4,000 and the training hour per person is 46 hours.

#### 2. Measures for preserving employees' rights and interests:

Since the incorporation of the labor union, the Company has held meetings between employer and labor periodically and negotiated for the laborers" interests and rights through formal meetings. In 2021, the Company held four meetings in total.

Furthermore, according to the Labor Standard Law and Accounting Handling Rules on Pension, the Company will contribute the pension fund to the employees' personal accounts in the Bank of Taiwan and Bureau of Labor Insurance on a monthly basis.

Meanwhile, the "Reserve Labor Pension Fund Supervisory Commission" will hold meetings to review the utilization of pension funds periodically to protect the retired employees' interests and rights.

#### <2> In 2021 and until the publication date, there is no loss suffered from labor disputes.

# <3> Estimated loss suffered by the Company due to labor disputes currently and in the future, and explanation measures

Since the incorporation of the labor union, the relationship between employees and the Company has remained fair through the good interaction and communication. Therefore, no significant dispute over labor has occurred, let alone the loss thereof. Therefore, the Company and employees will abide by the communication models to create a win-win situation when proceeding with communication, and there is no likelihood of any monetary loss resulting from labor dispute.

The reasons for financial ratio changes in 2021 as compared to 2020: Due to the increase in profits in 2021, the Company's financial structure became healthier, and its operating ability and profitability, and various indexes increased.

1. The debt-asset ratio decreased due to the increase in the assets of subsidiaries resulted from favorable profitability.

2. The ratio of long-term capital for property, plant and equipment was due to the increase in equity resulting from the increase in net profit after tax.

3. The increase in current ratio, quick ratio, and cash flow ratios was due to the decrease in long-term borrowings due within one year.

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

- 4. The increase in the interest coverage ratio was due to the increase in net profit before tax.
- 5. For the Inventory turnover rate, the average days of sales reduced due to the increase in cost of sales and turnover rate resulting from the strong recovery of demands.
- 6. The increase in property, plant and equipment turnover rate and total assets turnover rate was due to the increase in revenue.
- 7. The increase in various ratios under the operating ability was due to the increase in net profit after tax.
- 8. The increase in cash flow adequacy ratio and cash flow reinvestment ratio was due to the increase in the cash flow from operating activities.
- 9. The leverage fell at the lowest point for the past five years, which was due to the net operating loss incurred after reaching the highest point throughout the past nine years due to the effects of the outbreak in 2020.

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities global transportation supply chain resulted in the short supply of synthetic rubber. The Company managed to make appropriate coordination and arrangements for supply and procurements and recorded a significant increase in net profit before tax and the healthy growth of its various financial ratios. The ratios are described as follows:

- 1. The increase in ratio of long-term capital to property, plant and equipment was due to the increase in equity resulting from the increase in net profit after tax.
- 2. The increase in current ratio and quick ratio was due to the increase in current assets.
- 3. The increase in interest coverage ratio was due to the increase in net profit before tax.
- 4. For the Inventory turnover rate, the average days of sales reduced due to the increase in cost of sales and turnover rate resulting from the strong recovery of demands.For the Inventory turnover rate, the average days of sales reduced due to the increase in cost of sales resulting from the strong recovery of demands.
- 5. The increase in property, plant and equipment turnover rate and total assets turnover rate was due to the increase in revenue.
- 6. The increase in various ratios under the operating ability was due to the increase in net profit after tax.
- 7. The increase in cash flow ratios was due to the decrease in the long-term borrowings due within one year.
- 8. The decrease in leverage was due to the increase in net operating profits.

#### 1. Financial structure:

- (1) Debt-asset ratio = total liabilities / total assets
- (2) Ratio of long-term capital to property, plant and equipment = (total equity + non-current liabilities) / net worth of property, plant and equipment
- 2. Solvency:
- (1) Current ratio = current assets / current liabilities
- (2) Quick ratio = (current assets inventory prepaid expenses) / current liabilities
- (3) Interest coverage ratio = income before income tax and interest expenses / current interest expenses

#### 3. Operating ability:

- Receivables (including accounts receivable and notes receivable arising from business operations) turnover rate = net sales / average receivables (including accounts receivable and notes receivable arising from business operations) for each period
- (2) Average collection days for receivables = 365 / receivables turnover rate
- (3) Inventory turnover rate = cost of sales / average inventory
- (4) Payables (including accounts payable and notes payable arising from business operations) turnover rate = cost of sale / average payables (including accounts payable and notes payable arising from business operations) for each period
- (5) Average days of sale = 365 / inventory turnover rate
- (6) Property, plant and equipment turnover rate = net sales / average net worth of property, plant and equipment
- (7) Total asset turnover rate = net sales / average total assets

#### 4. Profitability:

- (1) Return on assets = [net income + interest expenses (1 tax rate)] / average total assets
- (2) Return on equity = net income / average total equity
- (3) Profit margin before tax = net income / net sales
- (4) EPS = (profit and loss attributable to owners of the parent dividends on preferred shares) / weighted average number of issued shares

#### 5. Cash flow:

- (1) Cash flow ratio = net cash flow from operating activities / current liabilities
- (2) Net cash flow adequacy ratio = net cash flow from operating activities for the most recent five years / (capital expenditures + inventory increase + cash dividend)
- (3) Cash flow reinvestment ratio = (net cash flow from operating activities cash dividend) / gross property, plant and equipment value + long-term investment + other non-current assets + working capital)

#### 6. Leveraging:

(1) Operating leverage = (net operating revenue - variable operating costs and expenses) / operating income
 (2) Financial leverage = operating income / (operating income - interest expenses)

Major changes and impacts:

I. Financial position:

The increase in current assets and total shareholders' equity during 2021 from 2020 was due to the increase in cash, receivables, and inventories resulting from the strong recovery of demands and favorable profitability.

#### II. Financial performance:

#### Analysis and comparison of financial performance

| Fiscal year<br>Item              | 2021       | 2020       | Amount change | Percentage change<br>(% ) |

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities The changes in 2021 as compared to 2020 and the effects:

- 1. The increase in revenue, gross profit, and operating profits was due to the recovery of customer demands for synthetic rubber and the commercial operation of SEBS' s new line of TSRC (Nantong)Industries.
- 2. The increase in operating expenses was primarily due to the surge in carriage costs resulting from the congestion of the global transportation supply chain under the effect of the global outbreak.
- 3. The changes in non-operating income and expenses was due to the gains from the disposals of lands and the favorable profits recorded by overseas subsidiaries in 2021 and the provision of impairment losses for intangible assets in 2020.

#### <2> Benefits generated: Expected to increase profitability.

It is estimated that the new plant of Shen Hua may improve our market share and increase profits; the BD storage tank may give rise to the low-price inventories to improve our profit margin.

# V. The Company's reinvestment policy for the most recent fiscal year, the main reasons for profit/loss generated thereby, the plan for improving re-investment profitability, and investment plans for the coming year

To maintain a leading position in the synthetic rubber market, the Company continues its strategic investment projects on specialty rubber with higher value and profit margins to sustain operating performance of the Company.

#### VI. Analysis and assessment of risk management

## <1> The effect of the change in interest rate and exchange rate and inflation on the profit and loss of the Company and future countermeasures

#### Unit: thousand NTD

Unit: thousand NTD

| 2021                             | Amount   | Accounting for the<br>percentage of net<br>operating revenues (%) | Accounting for the<br>percentage of net profit<br>before taxation (%) |  |
|----------------------------------|----------|---|---|--|
| Net interest income<br>(expense) | (80,665) | (0.2)   | (1.4)   |  |
| Net exchange gain (loss)         | 10,047   | 0.0   | 0.2   |  |

#### Interest rate change:

The interest rate risk of the Company comes from the liabilities generated from the operating demand. If there are obvious fluctuations for the expected interest rate, the Company will shorten the term for account receivables offered to customers or adopt proper financial instruments, such as long-term liabilities with fixed interest rates, adjustment in the borrowing currency or loan period, to lower the costs of funds with the most suitable borrowing portfolio.

#### Exchange rate fluctuation:

The Company receives and pays in foreign currencies for part of its sales and purchases. Therefore, significant changes in foreign exchange rates will have an impact on the Company's operating revenues, cost of goods sold and operating income. The Company has conducted exchange rate hedges for foreign currency assets and liabilities held and scheduled to be traded in order to reduce the impact of exchange rate fluctuations on its operations.

#### Inflation:

The fluctuation of raw material prices may have an impact on the operation costs of the Company. The responding measures against the risk include the mechanism of bulk procurement and long-term contracts to lower the changes in costs. As for the sale price of products, the Company will make proper adjustments in accordance with costs and market conditions to manage the impact generated from inflation on the Company.

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### <2> Policy on high risk and high leverage investments, loans to others, guarantee and endorsement and derivative transactions, and the main reason for profit or loss, and response measure to be taken in the future

The Company has not engaged in any high-risk, high-leveraged investments, extending loans to others, or derivatives transactions. Granting endorsements and guarantees is limited to an investee Company accounted for under the equity method. The above transactions will be performed in accordance with relevant requirements prescribed in the Company's "Procedures for the Handling Acquiring or Disposal of Assets," "Procedures for Extending Loan to Others," "Procedures for Granting Endorsements and Guarantees."

<3> R&D work to be carried out in the future and future expenditures expected for R&D work Unit: thousand NTD

Project nameExpected R&D spendingNew Generation and High Performance Tire Product Development50,000New Differentiated Polybutadiene Products37,000High Value-Added Thermoplastic Elastomer (TPE) Products178,000High Performance Materials and Formulas for Footwear106,000Advanced Process Technology Development86,000

<4> Effect on the Company's financial operations of important policies adopted and changes in the legal environment at home and abroad, and measures to be taken in response.

The Company has always complied with government's laws and regulations and monitored the change in government policies and laws at home and abroad. The change in government policies and laws in the country and overseas in the recent year did not cause any effect to the Company's finance and operations.

<5> Effect of changes in technology (including cybersecurity risks) and industry dynamics on the Company's financial and business operations, as well as the measures to be taken in response As the industry technology develops, The Company has invested greatly in R&D and process technology, continued to build various technology platforms, and worked with customers to jointly develop new technologies and products. Through these activities, The Company was able to enhance its technology and provide new solutions for customers, strengthening The Company position in specialty materials applications and market segments. However, synthetic rubber business can be highly influenced by the external factors such as butadiene price, natural rubber price, synthetic rubber supply-demand balance, and intensified market competition caused by new capacity additions. The Company has a sales-production-procurement (SPP) coordination mechanism in place to periodically review those external factors to control upstream cost and reduce the impact of price fluctuations to the Company. In addition, The Company has expanded its global presence and continued developing products for high-value applications to reduce the risk of being held limited to a single geographic location or industrial area, further strengthening its ability in responding to market changes. Regarding the increasingly important cybersecurity, apart from reinforcing the information protection educational training, the Company also introduced the "zero trust network," "multi-factor authentication," and "instant information security monitoring" systems to effectively improve the information safety protection ability of the Company and minimize risks related to information security.

<6> Effect of changes in the Company's corporate image on the Company's crisis management, and measures to be taken in response:

The Company continues to be fully engaged in developing energy-saving materials and creating operational success in accordance with its Company value in corporate social responsibility (CSR) and sustainable business philosophy. The Company also continues to pursue improvement and innovation in the economic, environmental and social dimensions of CSR, endeavoring to serve as a good corporate citizen and a positive force to the society. Moreover, The Company attaches great importance to supporting the society through various activities in helping disadvantaged students in local communities and other disadvantaged groups. At the same time, The Company volunteers in schools to help with interactive chemistry education activities, demonstrating The Company attention to corporate contribution and creating value to the society.

Furthermore, The Company implements policies to protect its intellectual properties, confidential information, and personal information of its customers and employees. The Company expects to integrate CSR into its core operation process, fulfill sustainable growth, and become customers' long-term partners. In corporate governance, The Company reg-

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities ularly holds shareholder meetings and investor conferences to increase the transparency of its financial and operations. As for crisis management, The Company has existing procedures to respond to crisis events including natural disasters and workplace accidents, reducing operational uncertainty to the minimum level.

## <7> Expected benefits and risks associated with merger and acquisitions, and mitigation measures being or to be taken:

To achieve corporate transformation and increase shareholders value, The Company continues to develop and assess equity investment, strategic alliance and merger and acquisitions (M&A)opportunities. The main risks of cross-border M&A include compliance with local M&A regulations and foreign investment requirements as well as post-M&A operation management. To ensure a smooth transition from transaction to post-deal integration, the Company would consult professional advisors with local expertise to set the deal structure conforming to both local and domestic regulations, while the management team would construct a global operating model to align with the Company's cross-border M&A strategy. Minimize potential risks arising from M&A.

#### <8> Expected benefits and risks associated with plant expansion and mitigation measures being or to be taken:

Regarding the initiative related to the environmental protection along the Yangtze River promoted by local governments and our optimistic view on the continual growth in the demand for synthetic rubber in the regional markets, the Company relocate Shen Hua Chemical to the South Area of the Chemical Industry Park of NETDA in Jiangsu Province and expanded its production capacity to 220,000 MT. The production capacity expansion is subject to limited risk as it is required by the operations and organized through detailed capital expenditure planning.

- <9> Risks associated with any consolidation of sales or purchasing operations, and mitigation measures being or to be taken:
  - Purchase: Capacity of the suppliers of butadiene, the Company's main raw materials, is limited. In order to stabilize the source of raw materials and in consideration of the acquisition cost, the Company entered into supply agreement with major domestic suppliers to secure the supply, which gave rise to the consolidation of purchases; however, none of the single supplier accounts for over 10% of the purchase ratio. In the event of force majeure experienced by the domestic suppliers, the Company can still purchase raw materials from foreign suppliers as such raw materials are international suppliers and materials. Therefore, there is no likelihood of short supply of the raw materials.
    - Sales: The Company's main customers are world's leading companies and the Company's long-term partners. Most of them are contract customers with strong financial health. The Company's business divisions also have control on the amount a customer can purchase while continue conducting credit investigation. Hence, there are no major risks on the business operations.
- <10> Effect upon and risk to the Company in the event a major quantity of shares belonging to a director, supervisor, or shareholder holding greater than a 10 percent stake in the Company has been transferred or has otherwise changed hands, and mitigation measures being or to be taken:

In the case of directors, managers, or shareholders holding more than 10% of the Company's common share transferring a major quantity of shares or otherwise changed hands may result in the change of management of the Company or affecting the stock price of the Company. TSRC's directors, managers, and shareholders holding more than 10% of the Company's common share are required to report any changes in their shareholding to the competent authority. As of the date of this annual report, there have been no events of TSRC's directors, manager, or shareholders holding more than 10% of the Company's common share transferring a major quantity of shares or otherwise changed hands.

- <11> Effect upon and risk to Company associated with any change in governance personnel or top management, and mitigation measures being or to be taken: No
- <12> Litigious and non-litigious matters involved the Company and/or any Company director, any Company supervisor, the general manager, any person with actual responsibility for the firm, any major shareholder holding a stake of greater than 10 percent, and/or any Company or companies controlled by the Company: No
- <13> Other important risks, and mitigation measures being or to be taken: No
- VII. Other important matters No

To TSRC Corporation:

The 2021 Relation Statement prepared by TSRC Corporation was in accordance with "Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises". The relevant financial information was reviewed according to the information disclosed in the notes of the consolidated financial statements during the aforementioned period by the accountants.

According to the review results from the accountants, the 2021 Relation Statement of TSRC Corporation disclosed relevant information in accordance with "Criteria Governing Preparation of Affiliation Reports, Consolidated Business Reports and Consolidated Financial Statements of Affiliated Enterprises". Its financial contents are consistent with the consolidated financial statement. Hence, there is no need for major modification.

The engagement partners on the audit resulting in this independent auditors' report are Ming-Hung Huang and Lin Wu.

#### Independent Auditors' Report To the Board of Directors of TSRC Corporation:

#### Opinion

We have audited the consolidated financial statements of TSRC Corporation and its subsidiaries ("the Group"), which comprise the consolidated balance sheets as of December 31, 2021 and 2020, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and with the International Financial Reporting Standards ("IFRSs"), International Accounting Standards ("IASs"), Interpretations developed by the International Financial Reporting Interpretations Committee ("IFRIC") or the former Standing Interpretations Committee ("SIC") endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

#### **Basis for Opinion**

We conducted our audits in accordance with the "Regulations Governing Auditing and Certification of Financial Statements by Certified Public Accountants" and the auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Certified Public Accountants Code of Professional Ethics in Republic of China ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year end December 31, 2021. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

#### 1. Revenue recognition

Please refer to note 4(q) and note 6(v) for disclosures related to revenue recognition.

Description of key audit matter:

Revenue is the key indicator used by investors and management while evaluating the Group's finance or operating performance. The accuracy of the timing and amount of revenue recognized have significant impact on the financial statements, for which the assumptions and judgments of revenue measurement and recognition rely on subjective judgments of the management. Therefore, we consider it as the key audit matter.

How the matter was addressed in our audit:

Testing the effectiveness of design and implementing the internal control (both manual and system control) of sales and collecting cycle; reviewing the revenue recognition of significant sales contracts to determine whether the accounting treatment, key judgment, estimation, and reasonable; analyzing the changes in top 10 customers from the most recent period and last year, and the changes in the price and quantity of each category of product line to determine whether if there are any significant misstatements; selecting sales transactions from a period of time before and after the balance sheet date, and verifying with the vouchers to determine the accuracy of the timing and amounts of revenue recognized; understanding whether if there is a significant subsequent sales return or discount; and reviewing whether the disclosure of revenue made by the management is appropriate.

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities 2. Inventory measurement

Please refer to note 4(h), note 5(a), and note 6(f) for disclosures related to inventory measurement. Description of key audit matter:

The inventory of the Group includes various types of synthetic rubber and its raw material. Since there is an oversupply and a low market demand in the rubber manufacturing industry, which may result in a decline on the price of raw material, the carrying value of inventories may exceed its net realizable value. The measurement of inventory depends on the evaluation of the management based on evidence from internal and external, both subjective and objective. Therefore, we consider it as the key audit matter.

How the matter was addressed in our audit:

The key audit procedures performed is to understand management's accounting policy of inventory measurement and determine whether it is reasonable and is being implemented. The procedures include reviewing the inventory aging documents and analyzing its changes; obtaining the documents of inventory measurement and evaluating whether if the bases used for net realizable value is reasonable; selecting samples and verifying them with the vouchers to test the accuracy of the amount; and reviewing whether the disclosure of inventory measurement made by the management is appropriate.

#### Other Matter

TSRC Corporation has additionally prepared its parent company only financial statements as of and for the years ended December 31, 2021 and 2020, on which we have issued an unmodified opinion.

#### Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and with the IFRSs, IASs, IFRIC, SIC endorsed and issueed into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the the Group' s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so. Those charged with governance (including the Audit Committee) are responsible for overseeing the Group' s financial reporting process.

#### Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities As part of an audit in accordance with auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group' s internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group' s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication. The engagement partners on the audit resulting in this independent auditors' report are Ming-Hung Huang and Lin Wu.

#### TSRC CORPORATION AND SUBSIDIARIES

#### Notes to the Consolidated Financial Statements

For the years ended December 31, 2021 and 2020 (Expressed in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

#### <1> Company history

TSRC Corporation (the original name was Taiwan Synthetic Rubber Corporation, hereinafter referred to as "the Company") was incorporated in the Republic of China (ROC) on November 22, 1973, as a corporation limited by shares in accordance with the ROC Company Act. In May 1999, Taiwan Synthetic Rubber Corporation was renamed TSRC Corporation as approved by the stockholders' meeting. In June 2016, the Company changed its registered address to be No.2, Singgong Rd., Dashe Dist., Kaohsiung City. The consolidated financial statements comprise the Company and its subsidiaries (the Group) and the interests of the Group in associate companies and in jointly controlled companies. The Group is mainly engaged in the manufacture, import and sale of various types of synthetic rubber, and the import, export, and sale of related raw materials. Please refer to note 14.

#### <2> Approval date and procedures of the consolidated financial statements

The consolidated financial statements were approved by to the Board of Directors and published on March 10, 2022.

#### <3> New standards, amendments and interpretations adopted:

(a) The impact of the International Financial Reporting Standards ("IFRSs") endorsed by the Financial Supervisory Commission, R.O.C. which have already been adopted.

The Group has initially adopted the following new amendments, which do not have a significant impact on its consolidated financial statements, from January 1, 2021:

- Amendments to IFRS 4 "Extension of the Temporary Exemption from Applying IFRS 9"
- Amendments to IFRS 9, IAS39, IFRS7, IFRS 4 and IFRS 16 "Interest Rate Benchmark Reform Phase 2" The Group has initially adopted the following new amendments, which do not have a significant impact on its consolidated financial statements, from April 1, 2021:
- Amendments to IFRS 16 "Covid-19-Related Rent Concessions beyond June 30, 2021"
- (b) The impact of IFRS issued by the FSC but not yet effective

The Group assesses that the adoption of the following new amendments, effective for annual period beginning on January 1, 2022, would not have a significant impact on its consolidated financial statements:

- Amendments to IAS 16 "Property, Plant and Equipment Proceeds before Intended Use"
- Amendments to IAS 37 "Onerous Contracts Cost of Fulfilling a Contract"
- Annual Improvements to IFRS Standards 2018-2020
- Amendments to IFRS 3 "Reference to the Conceptual Framework"
- (c) The impact of IFRS issued by IASB but not yet endorsed by the FSC

The following new and amended standards, which may be relevant to the Group, have been issued by the International Accounting Standards Board (IASB), but have yet to be endorsed by the FSC:

#### Standards or Interpreta-

| tions  | Content of amendment  | Effective date per IASB |
|--|---|-------------------------|
| Amendments to IAS 1<br>"Classification of Li-<br>abilities as Current or<br>Non-current" | The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of balance sheet, debt and other liabilities with an uncertain settlement date should be classified as current (due or potentially due to be settled within one year) or non-current. The amendments include clarifying the classification requirements for debt a company might settle by converting it into equity. |                         |

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities The Group is evaluating the impact of its initial adoption of the abovementioned standards or interpretations on its consolidated financial position and consolidated financial performance. The results thereof will be disclosed when the Group completes its evaluation.

The Group does not expect the other new and amended standards, which have yet to be endorsed by the FSC, to have a significant impact on its consolidated financial statements.

#### <4> Summary of significant accounting policies

The significant accounting policies presented in the consolidated financial statements are summarized as follows. Except for those described otherwise, the accounting policies have been applied consistently to all periods presented in these consolidated financial statements, and have been applied consistently to the balance sheet as of reporting date. (a) Statement of compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (the Regulations) and the IFRSs endorsed by the FSC.

- (b) Basis of preparation
  - (i) Basis of measurement

The consolidated financial statements have been prepared on a historical cost basis except for those otherwise explained in the accounting policies in the notes.

(ii) Functional and presentation currency

The functional currency of each individual consolidated entity is determined based on the primary economic environment. The consolidated financial statements are presented in New Taiwan dollars, which is Company's functional currency. The assets and liabilities of foreign operations are translated to the Group's functional currency at the exchange rates at the reporting date. The income and expenses of foreign operations are translated to the Group's functional currency at the average rate. Foreign currency differences are recognized in other comprehensive income. All financial information presented in New Taiwan dollars has been rounded to the nearest thousand.

- (c) Basis of consolidation
  - (i) Principles of preparation of consolidated financial statements

The consolidated financial statements incorporate the financial statements of the Company and its subsidiaries. The Company controls an investee when the investor is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its control over the investee.

The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. Transactions and balances, and any unrealized income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. The comprehensive income from subsidiaries is allocated to the Company and its non-controlling interests, even if doing so causes the non-controlling interests to have a deficit balance.

When necessary, adjustments are made to the financial statements of the subsidiaries to bring their accounting policies into line with those used by the Group.

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over its subsidiaries are accounted for as equity transactions. Any difference between the amount by which the noncontrolling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the shareholders of the parent.

When the Group loses control of a subsidiary, the Group derecognizes the assets (including goodwill) and liabilities of the former subsidiary at their carrying amounts from the consolidated statement and re-measures the fair value of retained interest at the date when control is lost. A gain or loss is recognized in profit or loss and is calculated as the difference between:

- 1) the aggregate of the fair value of consideration received and the fair value of any retained interest at the date when control is lost; and
- 2) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any noncontrolling interest.

The Group shall apply the accounting treatment to all previously recognizes amount related to its subsidiary in its comprehensive income as if the related assets and liabilities were disposed by the Group directly.

**Overview of financial status** 

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

#### Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### (d) Foreign currency

Transactions in foreign currencies are translated to the respective functional currencies of Group entities at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are remeasured to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortized cost in the functional currency at the beginning of the year adjusted for the effective interest and payments during the year, and the amortized cost in foreign currency translated at the exchange rate at the end of the year.

Exchange differences are generally recognized in profit or loss, except for those differences relating to the following, which are recognized in other comprehensive income:

- an investment in equity securities designated as at fair value through other comprehensive income;
- a financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective; or
- qualifying cash flow hedges to the extent that the hedges are effective.

When the settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely in the foreseeable future, foreign currency gains and losses arising from such items are considered to form part of a net investment in the foreign operation and are recognized in other comprehensive income, and presented in the translation reserve in equity.

- (e) Classification of current and non-current assets and liabilities
  - (i) An asset is classified as current under one of the following criteria, and all other assets are classified as noncurrent.
    - 1) It expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
    - 2) It holds the asset primarily for the purpose of trading;
    - 3) It expects to realize the asset within twelve months after the reporting period; or
    - 4) The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.
  - (ii) A liability is classified as current under one of the following criteria, and all other liabilities are classified as noncurrent.
    - 1) It expects to settle the liability in its normal operating cycle;
    - 2) It holds the liability primarily for the purpose of trading;
    - 3) The liability is due to be settled within twelve months after the reporting period even if refinancing or a revised repayment plan is arranged between the reporting date and the issuance date of the financial statements; or
    - 4) It does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.
- (f) Cash and cash equivalents

Cash and cash equivalents comprise cash balances, time deposits, and short-term investments with high liquidity that are subject to an insignificant risk of changes in their fair value.

The time deposits with maturity of one year or less from the acquisition date are listed in cash and cash equivalents because they are held for the purpose of meeting short-term cash commitments instead of investment or other purposes, are readily convertible to a fixed amount of cash, and are subject to an insignificant risk of changes in value.

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

# Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### (g) Financial instruments

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Group becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

### (i) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Financial assets are classified into the following categories: measured at amortized cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL).

The Group shall reclassify all affected financial assets only when it changes its business model in managing its financial assets.

- 1) Financial assets measured at amortized cost
  - A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:
  - it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
  - its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.

2) Fair value through other comprehensive income (FVOCI)

On initial recognition of an equity investment that is not held for trading, the Group may irrevocably elect to present subsequent changes in the investment' s fair value in other comprehensive income. This election is made on an instrument-by-instrument basis.

Equity investments at FVOCI are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in other comprehensive income and are never reclassified to profit or loss. Dividend income derived from equity investments is recognized on the date that the Group' s right to receive payment is established, which in the case of quoted securities is normally the ex-dividend date.

3) Fair value through profit or loss (FVTPL)

All financial assets not classified as amortized cost or FVOCI described as above are measured at FVTPL, including derivative financial assets and accounts receivable (except for those presented as accounts receivable but measured at FVTPL). On initial recognition, the Group may irrevocably designate a financial asset, which meets the requirements to be measured at amortized cost or at FVOCI, as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.

4) Impairment of financial assets

The Group recognizes its loss allowances for expected credit losses on financial assets measured at amortized cost (including cash and cash equivalents, notes and accounts receivable, other receivable and guarantee deposit paid).

The Group measures its loss allowances at an amount equal to lifetime expected credit loss (ECL), except for the following which are measured as 12-month ECL:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables are always measured at an amount equal to lifetime ECL.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

Letter to the Shareholders

Company profile

Corporate governance report

Information on capital raising activities

Overview of business operations

**Overview of financial status** 

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Group's historical experience and informed credit assessment, as well as forward-looking information.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

At each reporting date, the Group assesses whether financial assets carried at amortized cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets. For debt securities at FVOCI, the loss allowance is recognized in other comprehensive income instead of reducing the carrying amount of the asset. The Group recognizes the amount of expected credit losses (or reversal) in profit or loss, as an impairment gain or loss.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group' s procedures for recovery of amounts due.

5) Derecognition of financial assets

The Group derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

- (ii) Financial liabilities and equity instruments
  - 1) Classification of debt or equity

Debt or equity instruments issued by the Group are classified as financial liabilities or equity in accordance with the substance of the contractual agreement.

2) Equity instrument

Equity instruments refer to surplus equities of the assets after the deduction of all the debts for any contracts. Equity instruments issued are recognized as the amount of consideration received less the direct cost of issuing.

3) Financial liabilities

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

4) Derecognition of financial liabilities

The Group derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount of a financial liability extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

#### 5) Offsetting of financial assets and liabilities

The Group presents financial assets and liabilities on a net basis when the Group has the legally enforceable right to offset, and intends to settle such financial assets and liabilities on a net basis or to realize the assets and settle the liabilities simultaneously.

6) Financial guarantee contract

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder of a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial guarantee contract not designated as at fair value through profit or loss issued by the Group is recognized initially at fair value plus any directly attributable transaction cost. After initial recognition, it is measured at the higher of: (a) the amount of the loss allowance determined in accordance with IFRS 9; and (b) the amount recognized initially less, where appropriate, cumulative amortization recognized in accordance with the revenue recognition policies set out below.

#### (iii) Financial assets

The Group holds derivative financial instruments to hedge its foreign currency and interest rate exposures. Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are recognized in profit or loss.

(h) Financial instruments

The cost of inventories consists of all costs of purchase, costs of conversion, and other costs incurred in bringing the inventories to their present location and condition. The cost of inventories includes an appropriate share of fixed production overhead based on normal capacity and allocated variable production overhead based on actual output. However, unallocated fixed production overhead arising from lower or idle capacity is recognized in cost of goods sold during the period. If actual capacity is higher than normal capacity, fixed production overhead should be allocated based on actual capacity. The method of valuing inventories is the weighted-average method.

Inventories are measured at the lower of cost or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses at the end of the period. When the cost of inventories is higher than the net realizable value, inventories are written down to net realizable value, and the write-down amount is charged to current year's cost of goods sold. If net realizable value increases in the future, the cost of inventories is reversed within the original write-down amount, and such reversal is treated as a reduction of cost of goods sold.

(i) Investment in associates

Associates are those entities in which the Group has significant influence, but not control or joint control, over the financial and operating policies.

The equity of associates is incorporated in these consolidated financial statements using the equity method. Investments in associates are accounted for using the equity method and are recognized initially at cost. The cost of the investment includes transaction costs. The carrying amount of the investment in associates includes goodwill arising from the acquisition less any accumulated impairment losses.

The consolidated financial statements include the Group's share of the profit or loss and other comprehensive income of those associates, after adjustments to align their accounting policies with those of the Group, from the date on which significant influence commences until the date on which significant influence ceases. The Group recognizes any changes of its proportionate share in the investee within capital surplus, when an associate's equity changes due to reasons other than profit and loss or comprehensive income, which did not result in changes in the Group's proportionate share in the investee.

Gains and losses resulting from transactions between the Group and an associate are recognized only to the extent of unrelated Group' s interests in the associate.

When the Group's share of losses of an associate equals or exceeds its interests in an associate, it discontinues recognizing its share of further losses. After the recognized interest is reduced to zero, additional losses are provided for, and a liability is recognized, only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group adopts the acquisition method for changes in ownership interests of investment in associates. Goodwill is measured at the amount of fair value transferred out subtracted by the net amounts of the identifiable assets acquired and the liabilities assumed (normally measured at fair value) on the acquisition-date. If the balance after sub-traction is negative, the Group shall first reassess if all the assets acquired and the liabilities are identified correctly, then the Group can recognizes gain from bargain purchase in profit or loss.

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

## Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities If an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate, the Group shall continue to apply the equity method without remeasuring the retained interest.

(j) Investment in associates

A joint venture is a joint arrangement whereby the Group has joint control of the arrangement (i.e. joint ventures) in which the Group has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities. The Group recognizes its interest in a joint venture as an investment and accounts for that investment using the equity method in accordance with IAS 28 "Investments in Associates and Joint Ventures", unless the Group qualifies for exemption from that Standard. Please refer to note 4(i) for the application of the equity method.

The Group determines the type of joint arrangement in which it is involved by considering the structure and form of the arrangement, the separate legal vehicle, the terms agreed by the parties in the contractual arrangement and other facts and circumstances. When the facts and circumstances change, the Company reevaluates whether the classification of the joint arrangement has changed.

- (k) Property, plant and equipment
  - (i) Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs, less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

(ii) Reclassification to investment properties

Property is reclassified to investment property at its carrying amount when the use of the property changes from owner-occupied to investment property.

(iii) Subsequent cost

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Group.

#### (iv) Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment.

Land has an unlimited useful life and therefore is not depreciated.

The estimated useful lives, for the current and comparative years, of significant items of property, plant and equipment are as follows:

| 1) | Land improvements                | 7~30 years |
|----|----------------------------------|------------|
| 2) | Buildings                        | 3~60 years |
| 3) | Machinery                        | 3~50 years |
| 4) | Furniture and fixtures equipment | 3~8 years  |

Depreciation methods, useful lives, and residual values are reviewed at each reporting date. If expectations differ from the previous estimates, the changes are accounted for as a change in an accounting estimate.

#### (I) Investment property

Investment property is property held either to earn rental income or for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services, or for administrative purposes. Investment property is measured at cost on initial recognition, and subsequently at cost, less accumulated depreciation and accumulated impairment losses. Depreciation expense is calculated based on the depreciation method, useful life, and residual value which are the same as those adopted for property, plant and equipment.

Any gain or loss on disposal of an investment property (calculated as the difference between the net proceeds from disposal and the carrying amount) is recognized in profit or loss.

Rental income from investment property is recognized as other revenue on a straight-line basis over the term of the lease. Lease incentives granted are recognized as an integral part of the total rental income, over the term of the lease.

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### (m) Leases

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

### (i) As a leasee

The Group recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at, or before, the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by using the impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Group' s incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and

- payments for purchase or termination options that are reasonably certain to be exercised.

- The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:
- there is a change in future lease payments arising from the change in an index or rate; or
- there is a change in the Group' s estimate of the amount expected to be payable under a residual value guarantee; or
- there is a change of its assessment of the underlying asset purchase option; or
- there is a change of its assessment on whether it will exercise a purchase, extension or termination option; or
   there is any lease modifications

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Group accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Group presents its right-of-use assets that do not meet the definition of investment and its lease liabilities as a separate line item respectively in the statement of financial position.

The Group has elected not to recognize the right-of-use assets and lease liabilities for its short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(ii) As a leasee

When the Group acts as a lessor, it determines, at lease commencement, whether each lease is a finance lease or an operating lease. To classify each lease, the Group makes an overall assessment of whether the lease transfers to the lessee substantially all of the risks and rewards of ownership incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then the lease is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

When the Group is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Group applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, the Group applies IFRS15 to allocate the consideration in the contract.

(n) Leases

(i) Recognition and measurement

Goodwill arising on the acquisition of subsidiaries is measured at cost, less accumulated impairment losses. Expenditure on research activities is recognized in profit or loss as incurred.

Development expenditure is capitalized only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Group intends to, and has sufficient resources to, complete development and to use or sell the asset. Otherwise, it is recognized in profit or loss as incurred. Subsequent to initial recognition, development expenditure is measured at cost, less accumulated amortization and any accumulated impairment losses.

Other intangible assets, including customer relationships, patents and trademarks, that are acquired by the Group and have finite useful lives are measured at cost less accumulated amortization and any accumulated impairment losses.

(ii) Subsequent expenditure

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognized in profit or loss as incurred.

(iii) Amortization

Amortization is calculated over the cost of the asset, less its residual value, and is recognized in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use.

The estimated useful lives for current and comparative periods are as follows:

| 1) Computer software                  | 3 years                |
|---------------------------------------|------------------------|
| 2) Industrial technology and know-how | 10~20 years            |
| 3) Patent                             | 20 years               |
| 4) Non-compete agreement              | 3 years                |
| 5) Customer relationship              | 18 years               |
| 6) Trademark and goodwill             | Uncertain useful lives |

Amortization methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(o) Impairment - non-financial assets

At each reporting date, the Group reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset' s recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognized in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset' s carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

# Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### (p) Provisions

A provision is recognized if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects the current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

A provision for onerous contracts is recognized when the expected benefits to be derived by the Group from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Group recognizes any impairment loss on the assets associated with that contract.

## (q) Revenue

Revenue is measured based on the consideration to which the Group expects to be entitled in exchange for transferring goods or services to a customer. The Group recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer. The accounting policies for the Group' s main types of revenue are explained below.

(i) Sale of goods

The Group is mainly engaged in the manufacture and sale of various types of synthetic rubber. The Group recognizes revenue when control of the products has been transferred, being when the products are delivered to the customer, the ownership of the significant risks and rewards of the products have been transferred to the customer, and the Group is no longer engaged with the management of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract and the acceptance provisions have lapsed, or the Group has objective evidence that all criteria for acceptance have been satisfied.

A receivable is recognized when the goods are delivered as this is the point in time that the Group has a right to an amount of consideration that is unconditional.

(ii) Management services

The Group is engaged in providing management services. Revenue from providing services is recognized in the accounting period in which the services are rendered. For fixed price contracts, revenue is recognized based on the actual service provided at the end of the reporting period as a proportion of the total services to be provided. The proportion of services provided is determined based on surveys of work performed.

(iii) Financing components

The Group does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Group does not adjust any of the transaction prices for the time value of money.

(r) Government grants

The Group recognizes other government grants related to assets are initially recognized as deferred income at fair value if there is reasonable assurance that they will be received and the Group will comply with the conditions associated with the grant; they are then recognized in profit or loss on a systematic basis over the useful life of the asset. Grants that compensate the Group for expenses or losses incurred are recognized in profit or loss on a systematic basis in the periods in which the expenses or losses are recognized.

- (s) Employee benefits
  - (i) Defined contribution plans

Obligations for contributions to defined contribution pension plans are recognized as an employee benefit expense in profit or loss in the periods during which services are rendered by employees.

(ii) Defined benefit plans

The Group' s net obligation in respect of defined benefit plans is calculated separately for each the plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

**Table of Contents** 

Letter to the Shareholders

Company profile

Corporate governance report

Information on capital raising activities

Overview of business operations

**Overview of financial status** 

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Group, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income, and accumulated in retained earnings within equity. The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset). Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Group recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

(iii) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(t) Income tax

Income tax expenses include both current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes shall be recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred taxes shall not be recognized for the exceptions below:

- (i) Assets and liabilities that are initially recognized but are not related to the business combination and have no effect on net income or taxable gains (losses) during the transaction;
- (ii) temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Group is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and

(iii) taxable temporary differences arising on the initial recognition of goodwill.

Deferred taxes are measured at tax rates that are expected to be applied to temporary differences when they reserve, using tax rates enacted or substantively enacted at the reporting date, and reflect uncertainty related to income taxes, if any.

- Deferred tax assets and liabilities may be offset against each other if the following criteria are met:
- (i) The entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- (ii) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:
  - 1) the same taxable entity; or
  - 2) different taxable entities which intend annually either to settle current tax liabilities and assets on a net basis or to realize the assets and settle the liabilities, simultaneously.

Deferred tax assets are recognized for the carry forward of unused tax losses, unused tax credits, and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefits will be realized; such reductions are reversed when the probability of future taxable profits improves.

**Table of Contents** 

Letter to the Shareholders

Company profile

Corporate governance report

Information on capital raising activities

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

### (u) Earnings per share

Earnings per share (EPS) of common stock are calculated by dividing net income (or loss) for the reporting period attributable to common stockholders by the weighted-average number of common shares outstanding during that period. The weighted-average number of common shares outstanding is adjusted retroactively for the increase in common shares outstanding from stock issuance arising from the capitalization of retained earnings, or additional paid-in capital.

If the Company may settle the obligation by cash, by issuing shares, or in combination of both cash and shares, profit sharing to employees which will be settled in shares should be included in the weighted average number of shares outstanding in calculation of diluted EPS, if the shares have a dilutive effect. The number of shares is estimated by dividing the amount of profit sharing to employees in stock by the closing price (after considering the dilutive effect of dividends) of the common shares on the balance sheet date. Such dilutive effect of the potential shares needs to be included in the calculation of diluted EPS until the shares of profit sharing to employees are resolved in the board of directors meeting in the following year. If profit sharing is resolved to be distributed to employees in stock, the number of shares is determined by dividing the amount of profit sharing by fair value, which is the closing price (after considering the effect of dividends) of the shares on the day preceding the board meeting.

(v) Operating segments

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the Group). Operating results of the operating segment are regularly reviewed by the Group's chief operating decision maker to formulate a policy of resources allocation for the segment as well as assess its performance. Each operating segment consists of standalone financial information.

(w) Changes in accounting policies

Shen Hua Chemical Industries Co., Ltd. (Shen Hua) signed a relocation compensation contract with Nantong Economic and Technological Development Zone Chemical Park Management Office (Nantong Management Office) and Nantong Nengda Yanjiang Science and Technology Park Development Co., Ltd. (Nantong Nengda) on December 4, 2021. Based on the contract, Shen Hua will have to close its factories before December 31, 2024. It also signed an investment agreement for its new factories with Nantong Management Office, wherein the immovable buildings and facilities (defined as "immovable assets" herein) will be compensated at book value when they are written off. Therefore, the remaining useful life of the immovable assets is extended to December 31, 2024, resulting in the residual value to increase to CNY 75,974 thousand. The change in accounting estimate will not have a significant impact on the depreciation expenses for the years between 2021 and 2024.

# <5> Significant accounting assumptions and judgments, and major sources of estimation uncertainty

The preparation of the consolidated financial statements in conformity with the Regulations and the IFRSs endorsed by the FSC requires management to make judgments, estimates, and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

The Management will continually review the estimates and basic assumptions. Changes in accounting estimates will be recognized in the period of change and the future period of their impact.

There are no critical judgments in applying the accounting policies that have a significant effect on the amounts recognized in the consolidated financial statements.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year is as follows:

(a) Inventory measurement

Since inventory is measured by the lower of cost and net realizable value, the Group evaluated the inventory based on the selling price of the product line and price fluctuation of raw material, and written down the book value to net realizable value. Please refer to note 6(f) for inventory measurement.

(b) Impairment of investments accounted for using equity method

The assessment of impairment of intangible assets requires the Group to make subjective judgments to identify cash-generating units and estimate the recoverable amount of relevant cash-generating units. Any changes in these estimates based on changed economic conditions or business strategies could result in significant adjustments in future years. Refer to note 6(l) for further description of the impairment of intangible assets.

## (c) Non-current financial assets at fair value through other comprehensive income

|  | December | <u>· 31, 2021</u> | <u>December 31, 2020</u> |
|--|----------|-------------------|--------------------------|
| Equity investments at fair value through other comprehensive income: |          |                   |                          |
| Listed stocks (domestic)   | \$       | 668,140           | -                        |
| Unlisted stocks (domestic and overseas)                              |          | 792,446           | 952,645                  |
| Total  | \$       | 1,460,586         | 952,645                  |

(i) Equity investments at fair value through other comprehensive income

The Group held equity instrument investment for long-term strategic purposes, not held for trading purposes, which have been designated as measured at fair value through other comprehensive income.

Due to the financial asset activation, the Group sold the share of Taiwan High Speed Railway Co., Ltd. at the fair value for the year ended December 31, 2020, the fair value at that time of disposal was \$114,323 thousand and accumulated gain on disposal was \$84,323 thousand, which has been transferred from other equity to retained earnings.

(ii) For dividend income, please refer to note 6(x).

(iii) For market risk, please refer to note 6(z).

(iv) The aforementioned financial assets were not pledged as collateral.

(v) The significant financial assets at fair value through other comprehensive income denominated in foreign currency were as follows:

|                   | Foreign c<br>(thou: | urrency amount sand dollars) | Exchange rate | NTD     |
|-------------------|---------------------|------------------------------|---------------|---------|
| December 31, 2021 |                     |                              |               |         |
| ТНВ               | \$                  | 493,334                      | 0.8347        | 411,786 |
| December 31, 2020 |                     |                              |               |         |
| ТНВ               |                     | 205,493                      | 0.9556        | 196,370 |
|                   |                     |                              |               |         |

#### (d) Notes and accounts receivable

|                                | Decer | December 31, 2021 |           |
|--------------------------------|-------|-------------------|-----------|
| Notes receivable               | \$    | 951,817           | 571,220   |
| Accounts receivable            |       | 3,724,240         | 2,807,545 |
| Less: allowance for impairment |       | 7,399             | 5,194     |
|                                | \$    | 4,668,658         | 3,373,571 |

The Group applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected credit loss provision for all receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due, as well as incorporated forward-looking information. The loss allowance provision was determined as follows:

|                            |    |                         | December 31, 2021                                | L                             |
|----------------------------|----|-------------------------|--|-------------------------------|
|                            | G  | ross carrying<br>amount | Weighted-average<br>expected credit loss<br>rate | Loss allowance provi-<br>sion |
| Current                    | \$ | 4,611,091               | 0.05%~0.14%                                      | 2,559                         |
| 1 to 30 days past due      |    | 46,559                  | 2.35%~6.31%                                      | 1,173                         |
| 31 to 90 days past due     |    | 16,220                  | 8.07%~29.19%                                     | 1,480                         |
| More than 90 days past due |    | 2,187                   | 100%   | 2,187                         |
|                            | \$ | 4,676,057               |  | 7,399                         |

| Current               | \$        | 3,353,019                | 0.09%~0.17%                                      | 4,055                         |  |
| 1 to 30 days past due |           | 25,746                   | 2.78%~5.18%                                      | 1,139                         |  |
|                       | <u>\$</u> | 3,378,765                |  | 5,194                         |  |

The movement in the allowance for notes and accounts receivable was as follows:

|                                | For the years ended December 31 |       |         |
|--------------------------------|---------------------------------|-------|---------|
|                                |                                 | 2021  | 2020    |
| Balance at beginning of period | \$                              | 5,194 | 8,935   |
| Impairment losses recognized   |                                 | 2,362 | -       |
| Impairment loss reversed       |                                 | -     | (3,627) |
| Foreign exchange gain or loss  |                                 | (157) | (114)   |
| Balance at end of period       | \$                              | 7,399 | 5,194   |

The aforementioned financial assets were not pledged as collateral. For other credit risk information, please refers to note 6(z).

The carrying amounts of notes and accounts receivable with short maturity are not discounted under the assumption that the carrying amount approximates the fair value.

### (e) Other receivables (including related parties)

|                                     | Decen | nber 31, 2021 | December 31, 2020 |
|-------------------------------------|-------|---------------|-------------------|
| Other receivables - related parties | \$    | 47,938        | 39,572            |
| Other                               |       | 45,896        | 106,599           |
|                                     | \$    | 93,834        | 146,171           |

The aformentioned financial assets were not past due or impaired. For other credit risk information, please refers to note 6(z).

### (f) Inventories

The components of the Group's inventories were as follows:

|                  | December 31, 2021 |           | December 31, 2020 |  |
|------------------|-------------------|-----------|-------------------|--|
| Raw materials    | \$                | 1,648,221 | 1,719,583         |  |
| Supplies         |                   | 8,744     | 9,476             |  |
| Work in progress |                   | 299,749   | 297,435           |  |
| Finished goods   |                   | 2,986,188 | 2,258,866         |  |
| Merchandise      |                   | 686,915   | 487,104           |  |
| Total            | <u>\$</u>         | 5,629,817 | 4,772,464         |  |

As of December 31, 2021 and 2020, the Group did not pledge any collateral on inventories.

Except for operating costs arising from the ordinary sale of inventories, other gains and losses directly recorded under operating cost were as follows:

|  | 2021           | 2020     |
|--|----------------|----------|
| Loss on (reversal of) decline in market value of inventory | \$<br>(84,544) | 63,242   |
| Income from sale of scrap                                  | (28,244)       | (21,162) |
| Loss on physical count                                     | 1,010          | 6,165    |
| Unallocated production overhead                            | <br>394,301    | 433,063  |
| Total  | \$<br>282,523  | 481,308  |

Investment property comprises a number of commercial properties that are leased to third parties. Each of the leases contains an initial non-cancellable period of 1~5 years. Subsequent renewals are negotiable with the lessee, and no contingent rents are charged. Please refer to note 6(w) for further information.

The fair value of investment property (as disclosed in the financial statements) is based on a valuation by an independent appraiser. The range of yields applied to the net annual rentals to determine the fair value of the property were as follows:

| Region                   | 2021  | 2020  |  |  |
|--------------------------|-------|-------|--|--|
| Da'an Dist., Taipei City | 2.10% | 2.10% |  |  |

As of December 31, 2021 and 2020, the Group did not pledge any collateral on investment properties.

| December 31, 2021                   | \$ | 328,474                               | 24,594            |          |
| January 1, 2020                     | \$ | 392,856                               | 14,913            | -        |
| December 31, 2020                   | \$ | 503,264                               | 12,087            | 206,793  |
|                                     |    |                                       |                   |          |

(i) Amortization of intangible assets

For the years ended December 31, 2021 and 2020, the amortization of intangible assets are included in the statement of comprehensive income:

|                    | <br>2021      | 2020    |
|--------------------|---------------|---------|
| Operating costs    | \$<br>7,096   | 5,256   |
| Operating expenses | <br>115,476   | 132,297 |
|                    | \$<br>122,572 | 137,553 |

#### (ii) Impairment Testing

The goodwill and other intangible assets, which were mainly from the expected production of Dexco Polymers LP Synthetic rubber products' revenue growth in the United States and Europe market amounting to USD90,569 thousand, were generated and recognized by TSRC (USA) Investment Corporation when acquiring Dexco Polymers LP and Dexco Polymers Operating LLC in April 2011. In 2020, the global economic recession caused by COVID-19, as well as the delay of customers' shipments resulted in a decline in operations and profits, and indication of impairment.

For the purposes of impairment testing, goodwill is allocated to each of the acquirer' s cash-generating units that are expected to benefit from the synergies of the combination. TSRC (USA) Investment Corporation itself is not a separate cash-generating unit that cannot generate independent cash inflows; therefore, the impairment of goodwill and other intangible assets (including technical know-hows, patents, trademarks and customer relationships) are calculated at fair value after the merger of Dexco Polymers LP by TSRC (USA) Investment Corporation, minus the cost of disposal and the book value of net assets, in assessing whether impairment should be recognized.

**Table of Contents** 

Letter to the Shareholders

Company profile

Corporate governance report

Information on capital raising activities

Overview of business operations

Overview of financial status

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities For the abovementioned impairment testing for the year ended December 31, 2020, the fair value of intangible assets, minus disposal costs, were lower than the book value of net assets, wherein the amount of impairment loss were recognized as follows:

| <br>Goodwill  | Know-how | Patent |        | Customer rela-<br>tionship | Total   |
|---------------|----------|--------|--------|----------------------------|---------|
| \$<br>203,263 | 66,582   | 95,634 | 46,099 | 84,167                     | 495,745 |

The cash-generating unit used the financial data of July 31, 2020 as the measurement base date, wherein the measurement of the recoverable amount was determined using the fair value, less disposal cost, based on the market and income approach. The amount of fair value, less disposal cost, was estimated by using the discounted cash flow. The measurement of fair value uses the significant unobservable input classified into the third level. The following are the key assumptions used in estimating the recoverable amount. The values of these key assumptions represent the management's assessment of the future trends of related industries and the consideration of historical information from internal and external sources.

|                     | 2020.7.31 |
|---------------------|-----------|
| Discount rate       | 10.2%     |
| Revenue growth rate | 0.9%~7%   |

The discount rate and the cash flow were estimated based on the industry weighted average capital cost and the five-year financial forecast approved by the management, respectively. In addition, the cash flow over five years was estimated based on different growth rates for each product over the subsequent years.

The intangible assets of the Group had not been impaired for the year ended December 31, 2021.

(iii) The Group did not pledge any collateral on intangible assets.

(m) Short term and long term borrowings

The details of the Group's short-term and long-term borrowings were as follows:

(i) Short-term bank borrowings

|                 | December 31, 2021              |                  |    |           |                                 |

Among the increase in long-term borrowings is the participation of the Group in the federal government's Paycheck Protection Program, of which the amount of \$56,796 thousand (USD1,950 thousand) bore the interest rate of 1%. According to the loan contract, if the Group, has maintained its number of employees and salary levels, and the relevant salary, rent, utility expenses, have met all the required ratios defined in the contract for eight weeks since the date of the loan signature, wherein the full forgiveness of loan balance can be applied. As of December 31, 2020, the relevant forgiveness amount has been applied to the bank for review. In addition, the Company applied the "Welcoming the Return of Taiwanese Investment Initiative Act" loan of \$478,000 thousand from the bank in 2020. As of December 31, 2021 and 2020, the Company had used the amounts of \$148,837 thousand and \$75,727 thousand which were measured and recognized based on the market interest rate of 1.2%; and the difference between the actually interest rate of 0.45% and the market interest rate of 1.2% had been recorded as government subsidy under deferred income.

### 2) Long-term commercial paper payable (recorded as other long-term borrowings) The details of the Group's long-term commercial paper payable were as follows:

| The amounts recognized in the statement of cash flows for t                                       | he Group        | were as follows: |         |
|   |                 | 2021             | 2020    |
| Total cash outflow for leases   | \$              | 187,993          | 216,145 |

### (p) Operating leases

The Group leases out its investment property. The Group has classified these leases as operating leases, because it does not transfer substantially all of the risks and rewards incidental to the ownership of the assets; please refer to note 6(k).

A maturity analysis of lease payments, showing the undiscounted lease payments to be received after the reporting date are as follows:

|                                   | December 31, 2021 | December 31, 2020 |  |
|-----------------------------------|-------------------|-------------------|--|
| Less than one year \$             | 68,755            | 68,159            |  |
| One to two years                  | 61,118            | 67,739            |  |
| Two to three years                | 49,356            | 60,905            |  |
| Three to four years               | 12,138            | 48,363            |  |
| Four to five years                | 13,241            | 13,710            |  |
| More than five years              | 42,990            | 63,568            |  |
| Total undiscounted lease payments | 247,598           | 322,444           |  |

In 2021 and 2020, the rental income from investment property amounted to \$73,422 thousand and \$64,663 thousand, respectively.

### (p) Employee benefits

(i) Defined benefit plans

The following table shows a reconciliation between the present value of the defined benefit obligation and the fair value of plan assets:

|  | December 31, 2021 |           | December 31, 2020 |
|--|-------------------|-----------|-------------------|
| The present value of the defined benefit obligations | \$                | 605,909   | 606,090           |
| Fair value of plan assets                            |                   | (519,935) | (535,923)         |
| The net defined benefit liability                    | \$                | 85,974    | 70,167            |

The Group established the pension fund account for the defined benefit plan in Bank of Taiwan. The plan, under the Labor Standards Law, provides benefits based on an employee's length of service and average monthly salary for the six-month period prior to retirement.

1) Composition of plan assets

The Group allocates pension funds in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund, and such funds are managed by the Bureau of Labor Funds, Ministry of Labors. Minimum annual distributions of the funds by the Bureau shall be no less than the earnings attainable from the two-year time deposits with the interest rates offered by local banks.

The Group's Bank of Taiwan labor pension reserve account balance amounted to \$519,935 thousand at the end of the current reporting period. For information on the utilization of the labor pension fund assets including the asset allocation and yield of the fund, please refer to the website of the Bureau of Labor Funds, Ministry of Labor.

### 2) Movements in present value of defined benefit plan obligation

The movements in present value of the Group's defined benefit plan obligation for the years ended December 31, 2021 and 2020 were as follows:

|   |      | 2021     | 2020     |
|---|------|----------|----------|
| Defined benefit obligation as of 1 January  | \$   | 606,090  | 615,154  |
| Current service costs and interest  |      | 8,891    | 11,598   |
| Remeasurements of net defined benefit liability (asset)                                 |      |          |          |
| - Return on plan assets (excluding current interest expe                                | nse) | 6,392    | 15,816   |
| <ul> <li>Due to changes in financial assumption of actuarial g<br/>or losses</li> </ul> | ains | 31,893   | 14,247   |
| Benefits paid by the plan   |      | (47,357) | (50,725) |
| Defined benefit obligation as of 31 December  | \$   | 605,909  | 606,090  |

3) Movements in fair value of defined benefit plan assets

The movements in the fair value of the defined benefit plan assets for the years ended December 31, 2021 and 2020, were as follows:

|   |       | 2021     | 2020     |
|---|-------|----------|----------|
| Fair value of plan assets as of January 1               | \$    | 535,923  | 504,256  |
| Expected return   |       | 3,241    | 4,867    |
| Remeasurements of net defined benefit liability (asset) |       |          |          |
| - Return on plan assets (excluding current interest exp | ense) | 6,392    | 15,816   |
| Contributions made                                      |       | 21,736   | 61,709   |
| Benefits paid by the plan                               |       | (47,357) | (50,725) |
| Fair value of plan assets as of December 31             | \$    | 519,935  | 535,923  |

#### 4) Expenses recognized in profit or loss

The expenses recognized on profit or loss for the years ended December 31, 2021 and 2020 were as follows:

|   | <br>2021    | 2020  |
|---|-------------|-------|
| Current service cost                                  | \$<br>5,226 | 5,645 |
| Net interest on the defined benefit liability (asset) | <br>424     | 1,086 |
|   | \$<br>5,650 | 6,731 |

The Group recognized pension costs of the defined benefit plans in profit or loss as follows:

|                           | 2021        | 2020  |
|---------------------------|-------------|-------|
| Operating costs           | \$<br>3,402 | 4,008 |
| Operating expenses        | 1,972       | 2,328 |
| Other income and expenses | 276         | 290   |
| Other receivables         | <br>        | 105   |
|                           | \$<br>5,650 | 6,731 |

5) Actuarial assumptions

The following are the Group's principal actuarial assumptions:

|                              | December 31, 2021 | December 31, 2020 |
|------------------------------|-------------------|-------------------|
| Discount rate                | 0.500%            | 0.625%            |
| Future salary increases rate | 1.500%            | 1.500%            |

The Group expects to make contributions of \$18,773 thousand to the defined benefit plans in the next year starting from the reporting date of 2021.

The weighted average duration of the defined benefit plan is 9.69 years for the year ended December 31, 2021.

### 6) Sensitivity analysis

When calculating the present value of the defined benefit obligation, the Group uses judgments and estimations to determine the related actuarial assumptions, including discount rate, employee turnover rates and future salary changes, as of the balance sheet date. Any changes in the actuarial assumptions may significantly impact the amount of the defined benefit obligation.

As of December 31, 2021 and 2020, the effects on the present value of the defined benefit obligation arising from changes in principal actuarial assumptions were as follows:

|                             | Effect on defined benefit obligation |                |                |
|-----------------------------|--------------------------------------|----------------|----------------|
|                             |                                      | Increase 0.25% | Decrease 0.25% |
| December 31, 2021           |                                      |                |                |
| Discount rate               | \$                                   | (11,357)       | 11,661         |
| Future salary increase rate |                                      | 11,132         | (10,893)       |
| December 31, 2020           |                                      |                |                |
| Discount rate               |                                      | (11,785)       | 12,142         |
| Future salary increase rate |                                      | 11,608         | (11,330)       |

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions remain constant, would have affected the defined benefit obligation by the amounts shown above. The method used in the sensitivity analysis is consistent with the calculation of the pension liabilities in the balance sheets.

The method and assumptions used on current sensitivity analysis is the same as those of the prior year.

#### (ii) Defined contribution plans

The Group has made monthly contributions equal to 6% of each employee's monthly wages to the labor pension personal account at the Bureau of the Labor Insurance in accordance with the provisions of the Labor Pension Act. Under this defined contribution plan, the Group contributes a fixed amount to the Bureau of the Labor Insurance without additional legal or constructive obligations.

The Group has implemented the pension costs under the defined contribution plan and allocates retirement funds in according to the local regulation, and recognized the retirement funds in each period as current expenses.

The Group's pension costs under the defined contribution plan were \$97,612 thousand and \$47,436 thousand for the years 2021 and 2020, respectively. Payments were made to the Bureau of Labor Insurance and to local government for the overseas subsidiaries.

(iii) Short-term employee benefit liabilities

|                                 |           | December 31, 2021 | December 31, 2020 |
|---------------------------------|-----------|-------------------|-------------------|
| Compensated absence liabilities | <u>\$</u> | 50,242            | 48,138            |
|                                 |           |                   |                   |

(r) Income tax

(i) Income tax expenses

The amounts of the Group's income tax for the years ended December 31, 2021 and 2020 were as follows:

|   | 2021      |           | 2020             |
|---|-----------|-----------|------------------|
| Current income tax expense                        |           |           |                  |
| Current period                                    | \$        | 873,721   | 412,974          |
| Adjustment for prior periods                      |           | (192)     | 8,207            |
|   |           | 873,529   | 421,181          |
| Deferred tax expense (benefit)                    |           |           |                  |
| Origination and reversal of temporary differences |           | 295,154   | <u>(115,771)</u> |
| Income tax expenses of continued operations       | <u>\$</u> | 1,168,683 | 305,410          |

The amounts of the Group's income tax expenses recognized under other comprehensive income for the years ended December 31, 2021 and 2020 were as follows:

|   | <br>2021     | 2020 |
|---|--------------|------|
| Items that will not be reclassified subsequently to profit or loss: |              |      |
| Unrealized gains on equity instruments at fair value through        |              |      |
| other comprehensive income  | \$<br>21,345 |      |

Reconciliations of the Group's income tax expense (benefit) and the profit before tax for 2021 and 2020 were as follows:

|   | 2021            | 2020     |
|---|-----------------|----------|

Overview of business operations

Overview of financial status

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### 1) Unrecognized deferred tax liabilities

The consolidated entity is able to control the timing of the reversal of the temporary differences associated with investments in subsidiaries as of December 31, 2021. Also, management considers it probable that the temporary differences will not reverse in the foreseeable future. Hence, such temporary differences are not recognized under deferred tax liabilities. Details are as follows:

|  |           | December 31, 2021 |
|--|-----------|-------------------|
| Aggregate amount of temporary differences related to investments in subsidiaries | <u>\$</u> | 1,227,164         |
| Unrecognized deferred tax liabilities  | \$        | 245,433           |

2) Unrecognized deferred tax assets

The Group's deferred tax assets have not been recognized in respect of the following items:

|                                       | December 31, 2021 | December 31, 2020 |
|---------------------------------------|-------------------|-------------------|
| The carryforward of unused tax losses | <u> </u>          | 83,695            |

Under the R.O.C. Income Tax Act, tax losses can be carried forward for ten years to offset taxable income. Deferred income tax assets have not been recognized in respect of these items because it is not probable that the future taxable profit will be available, against which, the Group can utilize the benefits therefrom.

3) As of December 31, 2021, the Group didn't have any unrecognized deferred tax assets for taxable losses. Recognized deferred income tax assets and liabilities

Changes in the amount of deferred income tax assets and liabilities for 2021 and 2020 were as follows: Deferred tax assets:

|                              | De | efined benefit<br>plans | Allowance<br>for invento-<br>ry valuation | Loss carry-<br>forward | <u>Others</u> | Total    |

(iii) Assessment of tax

The tax returns of the Company have been assessed by the tax authorities for all years through 2019.

(s) Capital and other equity

(i) Capital

In accordance with the Company' s articles of incorporation, the capital share of the company amounted to \$12,000,000 thousand, divided into 1,200,000,000 shares, at NT\$10 per share.

As of December 31, 2021 and 2020, 825,709,978 shares of ordinary were issued.

### (ii) Additional paid-in capital

The components of additional paid-in capital as of December 31, 2021 and 2020, were as follows:

|                               | Decer | nber 31, 2021 | December 31, 2020 |  |
|-------------------------------|-------|---------------|-------------------|--|
| Share premium                 | \$    | 849           | 849               |  |
| Overaging unclaimed dividends |       | 49,876        | 48,682            |  |
|                               | \$    | 50,725        | 49,531            |  |

In accordance with the ROC Company Act, realized capital surplus can be used to increase share capital or to distribute as cash dividends after offsetting losses. The aforementioned capital surplus includes share premiums and donation gains. In accordance with the Regulations Governing the offering and Issuance of Securities by Securities Issuer, the amount of capital surplus to increase share capital shall not exceed 10 percent of the actual share capital amount.

(iii) Retained earnings

1) Legal reserve

The ROC Company Act stipulates that companies must retain 10% of their annual net earnings, as defined in the Act, until such retention equals the amount of issued share capital. When a company incurs no loss, it may, pursuant to a resolution to be adopted by the shareholders' meeting as required, distribute its legal reserve by issuing new shares or cash. Only the portion of legal reserve which exceeds 25% of the issued share capital may be distributed. In accordance with Rule No. 10802432410 issued by Ministry of Economic Affairs, R.O.C on January 9, 2020, the Company has to apply the profit distribution based on its financial statements in 2020, wherein the Company shall use the amount of net profit after tax, plus, those net amounts other than the net profits, which are recognized as undistributed surplus earnings, as the basis for the legal reserve.

#### 2) Special earnings reserve

By choosing to apply exemptions granted under IFRS 1 First-time Adoption of International Financial Reporting Standards during the Company's first-time adoption of the IFRSs endorsed by the FSC, unrealized revaluation increments and cumulative translation adjustments (gains) under shareholders' equity were reclassified to retained earnings at the adoption date. An increase in retained earnings due to the first-time adoption of the IFRSs endorsed by the FSC shall be reclassified as a special earnings reserve during earnings distribution. However, when adjusted retained earnings due to the first-time adoption of the IFRSs endorsed by the FSC are insufficient for the appropriation of a special earnings reserve at the transition date, the Company may appropriate a special earnings reserve up to the amount of increase in retained earnings. Upon the use, disposal, or reclassification of related assets, the Company may reverse the special earnings reserve proportionately. As a result of elections made according to IFRS 1, the Company has reclassified \$(103,035) thousand to retained earnings and is not required to appropriate a special earnings reserve.

A portion of current-period earnings and undistributed prior-period earnings shall be reclassified as a special earnings reserve during earnings distribution. The amount to be reclassified should be equal to the difference between the total net current-period reduction of special earnings reserve resulting from the first-time adoption of IFRSs and the carrying amount of other shareholders' equity as stated above. Similarly, a portion of undistributed prior-period earnings shall be reclassified as a special earnings reserve (which does not qualify for earnings distribution) to account for cumulative changes to other shareholders' equity pertaining to prior periods due to the first-time adoption of IFRSs. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

#### 3) Distribution of retained earnings

In accordance with the Company's articles of incorporation amended on June 19, 2020, when allocating the earnings for each fiscal year, the Company may, after offsetting losses from previous years, and paying taxes, and setting aside any statutory and appropriated retained earnings of 10% by ordinary resolution, may draw up the allocation of the balance remaining as dividends, retained earnings or otherwise. The allocation shall be proposed by the Board of Directors and shall be resolved at the shareholders' general meeting. However, dividends issued in cash may be passed by the Board of Directors with more than two-thirds of the directors' attendance, and be resolved by more than half of the directors, then be reported to the shareholders' general meeting.

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

In accordance with the original Company's articles of incorporation, when allocating the earnings for each fiscal year, the Company may, after offsetting losses from previous years, after paying taxes as per the law, and after 10% of the statutory surplus reserve is raised before the special surplus reserve is set up or turned over under the Securities and Exchange Act, the balances, when added to the unallocated surplus in the preceding period, are thereafter available for distribution and a surplus allocation proposal is submitted.

For the distribution based on the above of paragraph, the cash dividend shall not be less than 20% of the total distribution.

The above-mentioned distribution of surplus shall be drawn up by the Board of Directors and shall be submitted to the shareholders' meeting for resolution.

The distribution of 2020 and 2019 earnings as dividends to stockholders that were approved by the Company's shareholders' general meetings on August 4, 2021 and June 19, 2020, respectively, were as follows:

|  | <br>202                             | 20      | 20                     | 19           |

|       | Net income (loss) attributable to common shareholders of the Company           | \$        | 3,930,939 | (21,891) |
|       | Weighted-average number of common shares (in thousands)                        |           | 825,710   | 825,710  |
|       | Basic earnings (losses) per share (NTD)  | \$        | 4.76      | (0.03)   |
| (ii)  | Diluted earnings (losses) per share  |           |           |          |
|       |  |           | 2021      | 2020     |
|       | Net income (loss) attributable to common shareholders of the Company (diluted) | <u>\$</u> | 3,930,939 | (21,891) |
|       | Weighted-average number of common shares (basic) (in thousands)                |           | 825,710   | 825,710  |
|       | Impact on potential common shares  |           |           |          |
|       | Effect on employees' compensation (in thousands)                               |           | 4,515     |          |
|       | Weighted-average number of shares outstanding (diluted) (in thousands)         |           | 830,225   | 825,710  |
|       | Diluted earnings (losses) per share (NTD)                                      | \$        | 4.73      | (0.03)   |
|       |  |           |           |          |

(u) Remuneration to employees and directors

In accordance with the Company's articles of incorporation, if there is profit for the year, the Company should contribute more than 1% of its profit as employee remuneration, and less than 1% as directors' remuneration. The related regulations on the distribution of remunerations to employees and directors will have to be approved by the Board of Directors.

For the years ended December 31, 2021 and 2020, the Company recognized the employees' compensation of \$171,609 thousand and \$40,750 thousand, respectively, and the directors' remuneration of \$22,677 thousand and \$616 thousand, respectively. The amounts were estimated based on the profit-sharing percentages set by the Articles of Incorporation and were recorded as operating cost or operating expenses in the respective periods. Related information would be available at the Market Observation Post System website. There were no differences between the amounts distributed by the Board of Directors and the estimated amounts in the Company's consolidated financial reports for the years of 2021 and 2020.

(v) Revenue from contracts with customers

| Net gains (losses) recognized in other comprehensive income      | \$          | 54,272   | (593)    |

(z) Financial instruments

(i) Credit risk

1) Credit risk exposure

The maximum credit risk exposure of the Group's financial assets is equal to their carrying amount. As of December 31, 2021 and 2020, the maximum credit risk exposure amounted to \$10,780,140 thousand, and \$7,837,492 thousand, respectively.

2) Concentration of credit risk

The Group's cash and cash equivalents and accounts receivable are the main source of potential credit risk. The Group deposits its cash and cash equivalents in different financial institutions and has no concentration of credit risk on an individual customer. Therefore, the Group concluded that it is not exposed to credit risk. The Group guarantees bank loans for investees. The Group concluded that it is not exposed to credit risk for these transactions.

|                        |               |                              |               |           |

2) Sensitivity analysis

The Group's exposure to foreign currency risk arose from cash and cash equivalents, accounts and other receivables, borrowings, and accounts and other payables that were denominated in foreign currencies. If the NTD against the forgin currencies had depreciated / appreciated by 1%, the Group's net income before tax would have increased / decreased by \$5,744 thousand for the year ended December 31, 2021, the Group's net income before tax would have decreased / increased by \$521 thousand for the year ended December 31, 2020, respectively, with all other variable factors remaining constant. The analysis was performed on the same basis for both periods.

3) Foreign exchange gain and loss on monetary item

Since the Group has many kinds of functional currencies, the information on foreign exchange gain (loss) on monetary items is disclosed by gross amount. For the years ended December 31, 2021 and 2020, foreign exchange gain (including Derivative financial instruments for non-hedging profit and loss) amounting to \$10,047 thousand and \$22,075 thousand, respectively.

(iv) Interest rate risk analysis

Please refer to the note on liquidity risk management for the interest rate exposure of the Group's financial assets and liabilities.

The following sensitivity analysis is based on the risk exposure to interest rates of the non-derivative financial instruments at the reporting date. For floating-rate instruments, the sensitivity analysis assumes the floating-rate liabilities as of the reporting date are outstanding for the whole year.

If the interest rate had increased / decreased by 1%, the Group's net income before tax would have decreased / increased by \$71,102 thousand and \$86,025 thousand for the years ended December 31, 2021 and 2020, respectively, with all other variable factors remaining constant. This is mainly due to the Group's borrowing at floating rates.

2) Valuation techniques and assumptions used in fair value determination

If the financial instruments held by the Group have the quoted market price in active market, the fair value of the assets is based on the quoted market price. However, if the instruments have no quoted market price in active market, the Group uses market comparison approach to evaluate the fair value. The main assumption is based on the investee' s earnings after tax and the listed (over the counter) company' s earnings used in computing the market price. The estimated price has been discounted due to the price of the securities lacks the liquidity. The liquidity discount is a significant unobservable input in valuing equity investment. Forward exchange contracts are normally priced based on the exchange rates provided by the world agencies.

3) Reconciliation of Level 3 fair values

|  | Unquoted equity instruments |                                       |  |

| Financial assets fair value through other<br>comprehensive income |                           |                    |        |                 |                    |
| Equity investments without an active market                       | Liquidity discount at 20% | 1%                 | \$     | 9,904           | (9,904)            |
| December 31, 2020   |                           |                    |        |                 |                    |
| Financial assets fair value through other<br>comprehensive income |                           |                    |        |                 |                    |
| Equity investments without an active market                       | Liquidity discount at 20% | 1%                 | \$     | 11,912          | (11,912)           |
| The favorable and unfavorable effects rep                         | resent the changes in fa  | air value, and the | e fair | value is h      | ased on a vari-    |

The favorable and unfavorable effects represent the changes in fair value, and the fair value is based on a variety of unobservable inputs calculated using a valuation technique. The analysis above only reflects the effects of changes in a single input, and it does not include the interrelationships with another input.

# (aa)Financial risk management

(i) Overview

The Group is exposed to the following risks arising from financial instruments:

1) Credit risk

2) Liquidity risk

3) Market risk

This note discloses information about the Group's exposure to the aforementioned risks, and its goals, policies, and procedures regarding the measurement and management of these risks. For additional quantitative disclosures of these risks, please refer to the notes regarding each risk disclosed throughout the financial report.

(ii) Risk management framework

The Group's finance department is responsible for the establishment and management of the Group's risk management framework and policies. It is overseen by and reports to management, the Audit Committee, and the Board of Directors regarding the framework's operations.

The Group's risk management policies are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Group's Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Group. The Group's Audit Committee is assisted in its oversight role by Internal Audit, with un-

# Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities dertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

(iii) Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investment securities.

1) Accounts receivable and Notes Receivable

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the demographics of the Group's customer base, including the default risk of the industry and country in which customers operate, as these factors may have an influence on credit risk, The Group' s Accounts Receivable and Notes Receivable are mainly due from customers in China, each constituting 26% of the total amount of the receivables as of December 31, 2021, and 2020.

The sales department and the finance department of the Group has established a credit policy under which each new customer is analyzed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group's review includes the history of transactions with the counter-party, its financial position, and geographic considerations. Purchase limits are established for each customer, which represent the maximum open amount without requiring approval; these limits are reviewed on a periodic basis. Customers that fail to meet the Group's benchmark creditworthiness may transact with the Group only on a prepayment basis.

Goods are sold subject to a retention of title clause so that in the event of non-payment, the Group may have a secured claim. The Group otherwise does not require collateral in respect of trade and other receivables.

The Group has established an allowance for doubtful accounts to reflect its actual and estimated potential losses resulting from uncollectible accounts and trade receivables. The allowance for doubtful accounts consists primarily of specific losses regarding individual customers and estimates of potential losses based on the use of lifetime expected credit loss provision.

2) Investments

The credit risk exposure in the bank deposits and other financial instruments is measured and monitored by the Group's finance department. Since those who transact with the Group are banks and other external parties with good credit standing, financial institutions with a credit rating above investment grade, and government agencies, there are no non-compliance issues. With regard to investment in a financial institution with a credit rating above investment grade, an investment limit is set according to the long-term credit rating. Hence, there is no significant credit risk.

3) Guarantees

The Group's policy allows it to provide financial guarantees to business partners or to related parties and jointly controlled entities according to its percentage ownership in these entities. Financial guarantees provided by the Group as of December 31, 2021 and 2020, are disclosed in note 7 "Related-party Transactions."

# (iv) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it always has sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

Generally, the Group ensures that it maintains sufficient cash and unused loans to meet expected operational expenses, including the fulfillment of financial obligations. This excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

(v) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, and equity prices will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters.

1) Currency risk

The Group is exposed to currency risk on sales, purchases and borrowings that are denominated in a currency other than the respective functional currency of the Group. The currencies used in these transactions are NTD, USD, EUR, JPY and CNY.

Overview of business operations

**Overview of financial status** 

Review and analysis of the Company's financial position and financial performance, and risk management

# Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities Foreign exchange gains and losses resulting from account and trade receivables held by the Group in a currency other than the respective functional currencies are used to offset foreign exchange gains and losses resulting from short-term loans denominated in a foreign currency. Hence, the Group's risk exposure to foreign exchange risk is reduced.

Interest expenses are denominated in the same currency as that of the principal. Generally, the currency of loans matches that of the Group's operating cash flow, primarily consisting of NTD, USD, EUR, JPY, and CNY.

With regard to monetary assets and liabilities denominated in a foreign currency, when a short-term risk exposure exists, the Group relies on immediate foreign exchange transactions to ensure the net exposure to foreign exchange risk is maintained at an acceptable level.

The Group does not hedge against investments of related parties.

# 2) Interest rate risk

The interest rates of the Group's long-term and short-term borrowings are floating. Hence, changes in market conditions will cause fluctuations in the effective interest rate of the aforementioned loans. The Group's finance department monitors and measures potential changes in market conditions, entering into interest rate swaps to achieve a fixed interest rate on the Group's loans.

#### 3) Other market price risk

The Group does not enter into any commodity contracts other than to meet the Group's expected usage and sales requirements; such contracts are not settled on a net basis.

### (ab) Capital management

The Group's goal of capital management is to ensure the Group's continuing operating capacity, and to continuously provide remuneration to the shareholders and benefits to other equity holders. To ensure that the above-mentioned goal is achieved, the Group's management reviews its capital structure periodically. In consideration of the overall economic situation, financing cost and sufficiency of cash in-flows generated by operating activities, the Group will adjust its capital structure by paying dividends, issuing new stock, purchasing treasury stock, increasing or decreasing loans, and issuing or purchasing bonds.

The Group's capital structure at the end of the reporting period were as follows:

|                   | Dec       | ember 31, 2021 | December 31, 2020 |
|-------------------|-----------|----------------|-------------------|
| Total liabilities | \$        | 12,705,945     | 13,409,723        |
| Total equity      |           | 20,123,818     | 15,858,659        |
| Total assets      | <u>\$</u> | 32,829,763     | 29,268,382        |
| Debts ratio       |           | 39%            | 46%               |

As of December 31, 2021, the debts ratio decreased is mainly resulted from increasing profit and loan repayments. (ac) Investing and financing activities not affecting current cash flow

The Group did not have non-cash flow transactions on investing and financing activities for the years ended December 31, 2021 and 2020.

(ad) Reconciliation of liabilities arising from financing activities

Reconciliations of liabilities arising from financing activities for the years ended December 31, 2021 and 2020 was as follows:

|   |                 |             | N                               | es   |        |                      |

Note1 : Other personnel expenses included meals, employee welfare, training expenses and employees' bonus.

Note2 : Depreciation expenses excluded expenses for investment property recognized under other income and expenses, amounting to \$14,725 thousand and \$14,726 thousand for the years ended December 31, 2021 and 2020 respectively.

(b) To comply with the policy, Shen Hua signed a relocation compensation contract with Nantong Management Office and Nantong Nengda on December 4, 2021. It also signed an investment agreement for its new factories with Nantong Management Office at the compensated amount of CNY 479,677 thousand. Following the agreement schedule, Shen Hua will return the right to use the land after moving and demolishing its immovable assets in 2024. As for the movable assets, they will be transported to the new factories for further operation. For the year ended December 31, 2021, the Group recognized provision for demolition and relocation amounting to NTD 241,779 thousand.

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities (4) Other methods: EX: delegated investments.

- Note 2: The investment income (losses) were recognized under the equity method and based on the financial statements audited by the auditor of the Company.
- Note 3: The investment income (losses) were recognized under the equity method and based on the financial statements audited by international accounting firms.

Note 4: Amounts in foreign currencies were translated based on the exchange rate at the reporting date (USD1 to NTD27.690). Note 5: The transactions within the Group were eliminated in the consolidated financial statements.

### (ii) Limitation on investment in Mainland China:

|              |   | Unit:  | thousand NTD/thousand USD   |
|--------------|---|--|---|
| Company name | Accumulated investment<br>amount in Mainland China<br>as of December 31, 2021 | Investment (amount)<br>approved by Investment<br>Commission, Ministry of<br>Economic Affairs | Maximum investment<br>amount set by Investment<br>Commission, Ministry of<br>Economic Affairs |
| TSRC         | 467,961<br>(USD16,900)  | 5,187,306<br>(USD187,335)<br>(Note2)   | (Note1)   |

Note1 : In accordance with the "Regulations on Permission for Investment or Technical Cooperation in Mainland China" and the "Principles for Examination of Applications for Investment or Technical Cooperation in Mainland China" amended and ratified by the Executive Yuan on August 22, 2008, the Company met the criteria for operational headquarters under the Statute for Industrial Innovation and obtained approval from the Industrial Development Bureau, Ministry of Economic Affairs, on August 18, 2021. As it has an operational headquarters status, the Company is not subject to the limitation as to the amount of investment in Mainland China during the period from August 12, 2021 to August 11, 2024.

Note2 : This amount includes capital increase out of earnings, approved by the Investment Commission, MOEA. Note3 : Amounts in foreign currencies were translated based on the exchange rate at the reporting date (USD1 to NTD27.690).

(iii) Significant transactions:

Related information is provided in note 13(a)x.

| Wei Dah Development Co., Ltd.    | 53,708,923 | 6.50%      |

# <14> Segment information

### (a) General information

There are two segments which should be reported: synthetic rubber and non-synthetic rubber others. The synthetic rubber segment produces and sells synthetic rubber and TPE products. The non-synthetic rubber segment produces and sells applied materials. The others segment provides storage service.

A reportable department is a strategic business unit providing different products and services. Because each strategic business unit requires different kinds of techniques and marketing tactics, it should be separately managed. Most of the strategic divisions were acquired separately. The management of the acquired divisions remains employed by the Group.

(b) Information on income and loss, assets, liabilities, basis of measurement, and the reconciliation for reportable segments

The Group uses the internal management report that the chief operating decision maker reviews as the basis to determine resource allocation and make a performance evaluation. The internal management report includes profit before taxation. Because taxation and extraordinary activity are managed on a group basis, they are not able to be allocated to each reportable segment. In addition, not all profit or loss from reportable segments includes significant non-cash items such as depreciation and amortization. The reportable amount is consistent with that in the report used by the chief operating decision maker.

The operating segment accounting policies are consistent with those described in note 4 "Significant Accounting Policies".

The Group treated intersegment sales and transfers as third-party transactions. They are measured at market price. Information on reportable segments and reconciliation for the Group is as follows:

# Independent Auditors' Report To the Board of Directors of TSRC Corporation:

### Opinion

We have audited the parent company only financial statements of TSRC Corporation, which comprise the balance sheets as of December 31, 2021 and 2020, and the statements of comprehensive income, changes in equity and cash flows for the years then ended, and notes to the parent company only financial statements, including a summary of significant accounting policies. In our opinion, the accompanying parent company only financial statements present fairly, in all material respects, the financial position of the TSRC Corporation as of December 31, 2021 and 2020, and its financial performance and its cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

#### **Basis for Opinion**

We conducted our audits in accordance with the "Regulations Governing Auditing and Certification of Financial Statements by Certified Public Accountants" and the auditing standards generally accepted in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the TSRC Corporation in accordance with the Certified Public Accountants Code of Professional Ethics in Republic of China ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis of our opinion.

#### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the parent company only financial statements for the year ended December 31, 2021. These matters were addressed in the context of our audit of the parent company only financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

1. Revenue recognition

Please refer to note 4(q) and 6(t) for disclosures related to revenue recognition.

Description of key audit matter:

Revenue is the key indicator used by investors and management while evaluating the TSRC Corporation's finance or operating performance. The accuracy of the timing and amount of revenue recognized have significant impact on the financial statements, for which the assumptions and judgments of revenue measurement and recognition rely on subjective judgments of the management. Therefore, we consider it as the key audit matter.

How the matter was addressed in our audit:

Testing the effectiveness of design and implementing the internal control (both manual and system control) of sales and collecting cycle; reviewing the revenue recognition of significant sales contracts to determine whether the accounting treatment key judgment, estimation, and appropriate; analyzing the changes in top 10 customers from the most recent period and last year, and the changes in the price and quantity of each category of product line to determine whether if there are any significant misstatements; selecting sales transactions from a period of time before and after the balance sheet date, and verifying with the vouchers to determine the accuracy of the timing and amounts of revenue recognized; understanding whether if there is a significant subsequent sales return or discount; and reviewing whether the disclosure of revenue made by the management is appropriate.

#### 2. Inventory measurement

Please refer to note 4(g), note 5(a), and note 6(f) for disclosures related to inventory measurement. Description of key audit matter:

The inventory of TSRC Corporation includes various types of synthetic rubber and its raw material. Since there is an oversupply and a low market demand in the rubber manufacturing industry, which may result in a decline on the price of raw material, the carrying value of inventories may exceed its net realizable value. The measurement of inventory depends on the evaluation of the management based on evidence from internal and external, both subjective and objective. Therefore, we consider it as the key audit matter.

How the matter was addressed in our audit:

The key audit procedures performed is to understand management's accounting policy of inventory measurement and determine whether it is reasonable and is being implemented. The procedures include reviewing the inventory aging documents

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities and analyzing its changes; obtaining the documents of inventory measurement and evaluating whether if the bases used for net realizable value is reasonable; selecting samples and verifying them with the vouchers to test the accuracy of the amount; and reviewing whether the disclosure of inventory measurement made by the management is appropriate.

#### Responsibilities of Management and Those Charged with Governance for the Parent Company Only Financial Statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with Regulations Governing the Preparation of Financial Reports by Securities Issuers and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the TSRC Corporation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the TSRC Corporation or to cease operations, or has no realistic alternative but to do so.

Those charged with governance(including the Audit Committee) are responsible for overseeing the TSRC Corporation's financial reporting process.

#### Auditors' Responsibilities for the Audit of the Parent Company Only Financial Statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the auditing standards generally accepted in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with auditing standards generally accepted in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the parent company only financial statements whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the TSRC Corporation' s internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management' s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the TSRC Corporation' s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor' s report. However, future events or conditions may cause the TSRC Corporation to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of the investment in other entities accounted for using the equity method to express an opinion on this financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the parent company only financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication. The engagement partners on the audit resulting in this independent auditors' report are Ming-Hung Huang and Lin Wu.

# TSRC CORPORATION

# Notes to the Financial Statements

For the years ended December 31, 2021 and 2020(Expressed in Thousands of New Taiwan Dollars, Unless Otherwise Specified)

# <1> Company history

TSRC Corporation (the original name was Taiwan Synthetic Rubber Corporation, hereinafter referred to as "the Company") was incorporated in the Republic of China (ROC) on November 22, 1973, as a corporation limited by shares in accordance with the ROC Company Act. In May 1999, Taiwan Synthetic Rubber Corporation was renamed TSRC Corporation as approved by the stockholders' meeting. In June 2016, the Company changed its registered address to be No.2, Singgong Rd., Dashe Dist., Kaohsiung City. The Company is mainly engaged in the manufacture, import, and sale of various types of synthetic rubber, and the import, export, and sale of related raw materials.

# <2> Approval date and procedures of the financial statements

The parent company only financial statements were approved by the Board of Directors and published on March 10, 2022.

# <3> New standards, amendments and interpretations adopted:

(a) The impact of the International Financial Reporting Standards ("IFRSs") endorsed by the Financial Supervisory Commission, R.O.C. which have already been adopted.

The Company has initially adopted the following new amendments, which do not have a significant impact on its consolidated financial statements, from January 1, 2021:

- Amendments to IFRS 4 "Extension of the Temporary Exemption from Applying IFRS 9"
- Amendments to IFRS 9, IAS39, IFRS7, IFRS 4 and IFRS 16 "Interest Rate Benchmark Reform Phase 2"

The Company has initially adopted the following new amendments, which do not have a significant impact on its financial statements, from April 1, 2021:

- Amendments to IFRS 16 "Covid-19-Related Rent Concessions beyond June 30, 2021"
- (b) The impact of IFRS issued by the FSC but not yet effective

The Company assesses that the adoption of the following new amendments, effective for annual period beginning on January 1, 2022, would not have a significant impact on its financial statements:

- Amendments to IAS 16 "Property, Plant and Equipment Proceeds before Intended Use"
- Amendments to IAS 37 "Onerous Contracts Cost of Fulfilling a Contract"
- Annual Improvements to IFRS Standards 2018–2020
- Amendments to IFRS 3 "Reference to the Conceptual Framework"
- (c) The impact of IFRS issued by IASB but not yet endorsed by the FSC

The following new and amended standards, which may be relevant to the Company, have been issued by the International Accounting Standards Board (IASB), but have yet to be endorsed by the FSC:

| Standards or Interpre-<br>tations | Content of amendment  | Effective date per<br>IASB |
|-----------------------------------|---|----------------------------|
| 1 "Classification of              | The amendments aim to promote consistency in applying the require-<br>ments by helping companies determine whether, in the statement of<br>balance sheet, debt and other liabilities with an uncertain settlement<br>date should be classified as current (due or potentially due to be settled<br>within one year) or non-current. The amendments include clarifying the<br>classification requirements for debt a company might settle by convert-<br>ing it into equity. | January 1, 2023            |

The Company is evaluating the impact of its initial adoption of the abovementioned standards or interpretations on its consolidated financial position and financial performance. The results thereof will be disclosed when the Company completes its evaluation.

The Company does not expect the other new and amended standards, which have yet to be endorsed by the FSC, to have a significant impact on its financial statements.

# <4> Summary of significant accounting policies

The significant accounting policies presented in the parent company only financial statements are summarized as follows. Except for those described otherwise, the accounting policies have been applied consistently to all periods presented in these parent company only financial statements, and have been applied consistently to the balance sheet as of reporting date.

(a) Statement of compliance

The financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers (the Regulations).

- (b) Basis of preparation
  - (i) Basis of measurement

The financial statements have been prepared on a historical cost basis except for those otherwise explained in the accounting policies in the notes.

(ii) Functional and presentation currency

The functional currency of each entity is determined based on the primary economic environment. The Company's financial statements are presented in New Taiwan dollars, which is the Company's functional currency. All financial information presented in New Taiwan dollars has been rounded to the nearest thousand.

(c) Foreign currency

Transactions in foreign currencies are translated to the respective functional currencies of Company entities at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are remeasured to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortized cost in the functional currency at the beginning of the year adjusted for the effective interest and payments during the year, and the amortized cost in foreign currency translated at the exchange rate at the end of the year.

Exchange differences are generally recognized in profit or loss, except for those differences relating to the following, which are recognized in other comprehensive income:

- (i) an investment in equity securities designated as at fair value through other comprehensive income;
- (ii) a financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective; or
- (iii) qualifying cash flow hedges to the extent that the hedges are effective.

When the settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely in the foreseeable future, foreign currency gains and losses arising from such items are considered to form part of a net investment in the foreign operation and are recognized in other comprehensive income, and presented in the translation reserve in equity.

(d) Classification of current and non-current assets and liabilities

(i) An asset is classified as current under one of the following criteria, and all other assets are classified as noncurrent.

- 1) It expects to realize the asset, or intends to sell or consume it, in its normal operating cycle;
- 2) It holds the asset primarily for the purpose of trading;
- 3) It expects to realize the asset within twelve months after the reporting period; or
- 4) The asset is cash or a cash equivalent unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.
- (ii) A liability is classified as current under one of the following criteria, and all other liabilities are classified as noncurrent.
  - 1) It expects to settle the liability in its normal operating cycle;
  - 2) It holds the liability primarily for the purpose of trading;
  - 3) The liability is due to be settled within twelve months after the reporting period even if refinancing or a revised repayment plan is arranged between the reporting date and the issuance date of the financial statements; or
  - 4) It does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

# Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### (e) Cash and cash equivalents

Cash and cash equivalents comprise cash balances, time deposits, and short-term investments with high liquidity that are subject to an insignificant risk of changes in their fair value.

The time deposits with maturity of one year or less from the acquisition date are listed in cash and cash equivalents because they are held for the purpose of meeting short-term cash commitments instead of investment or other purposes, are readily convertible to a fixed amount of cash, and are subject to an insignificant risk of changes in value.

(f) Financial instruments

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument. A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

(i) Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Financial assets are classified into the following categories: measured at amortized cost, fair value through other comprehensive income (FVOCI) and fair value through profit or loss (FVTPL).

The Company shall reclassify all affected financial assets only when it changes its business model in managing its financial assets.

1) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

These assets are subsequently measured at amortized cost, which is the amount at which the financial asset is measured at initial recognition, plus/minus, the cumulative amortization using the effective interest method, adjusted for any loss allowance. Interest income, foreign exchange gains and losses, as well as impairment, are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.

2) Fair value through other comprehensive income (FVOCI)

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment' s fair value in other comprehensive income. This election is made on an instrument-by-instrument basis.

Equity investments at FVOCI are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in other comprehensive income and are never reclassified to profit or loss.

3) Fair value through profit or loss (FVTPL)

All financial assets not classified as amortized cost or FVOCI described as above are measured at FVTPL, including derivative financial assets and accounts receivable (except for those presented as accounts receivable but measured at FVTPL). On initial recognition, the Company may irrevocably designate a financial asset, which meets the requirements to be measured at amortized cost or at FVOCI, as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.

4) Impairment of financial assets

The Company recognizes its loss allowances for expected credit losses on financial assets measured at amortized cost (including cash and cash equivalents, notes and accounts receivable, other receivable and guarantee deposit paid).

The Company measures its loss allowances at an amount equal to lifetime expected credit loss (ECL), except for the following which are measured as 12-month ECL:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowance for trade receivables are always measured at an amount equal to lifetime ECL.

**Table of Contents** 

Letter to the Shareholders

Company profile

Corporate governance report

Information on capital raising activities

Overview of business operations

**Overview of financial status** 

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Company's historical experience and informed credit assessment as well as forward-looking information.

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

At each reporting date, the Company assesses whether financial assets carried at amortized cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets. For debt securities at FVOCI, the loss allowance is recognized in other comprehensive income instead of reducing the carrying amount of the asset. The Company recognizes the amount of expected credit losses (or reversal) in profit or loss, as an impairment gain or loss.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company' s procedures for recovery of amounts due.

5) Derecognition of financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

- (ii) Financial liabilities and equity instruments
  - 1) Classification of debt or equity

Debt or equity instruments issued by the Company are classified as financial liabilities or equity in accordance with the substance of the contractual agreement.

2) Equity instrument

Equity instruments refer to surplus equities of the assets after the deduction of all the debts for any contracts. Equity instruments issued are recognized as the amount of consideration received less the direct cost of issuing.

3) Financial liabilities

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

4) Derecognition of financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

**Table of Contents** 

Letter to the Shareholders

Company profile

Corporate governance report

Information on capital raising activities

Overview of business operations

**Overview of financial status** 

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities On derecognition of a financial liability, the difference between the carrying amount of a financial liability extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

5) Offsetting of financial assets and liabilities

The Company presents financial assets and liabilities on a net basis when the Company has the legally enforceable right to offset, and intends to settle such financial assets and liabilities on a net basis or to realize the assets and settle the liabilities simultaneously.

6) Financial guarantee contract

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder of a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial guarantee contract not designated as at fair value through profit or loss issued by the Company is recognized initially at fair value plus any directly attributable transaction cost. After initial recognition, it is measured at the higher of: (a) the amount of the loss allowance determined in accordance with IFRS 9; and (b) the amount recognized initially less, where appropriate, cumulative amortization recognized in accordance with the IFRS 15.

(iii) Derivative financial instruments

The Company holds derivative financial instruments to hedge its foreign currency exposures. Derivatives are recognized initially at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are recognized in profit or loss.

(g) Inventories

The cost of inventories consists of all costs of purchase, costs of conversion, and other costs incurred in bringing the inventories to their present location and condition. The cost of inventories includes an appropriate share of fixed production overhead based on normal capacity and allocated variable production overhead based on actual output. However, unallocated fixed production overhead arising from lower or idle capacity is recognized in cost of goods sold during the period. If actual capacity is higher than normal capacity, fixed production overhead should be allocated based on actual capacity. The method of valuing inventories is the weighted-average method.

Inventories are measured at the lower of cost or net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses at the end of the period. When the cost of inventories is higher than the net realizable value, inventories are written down to net realizable value, and the write-down amount is charged to current year's cost of goods sold. If net realizable value increases in the future, the cost of inventories is reversed within the original write-down amount, and such reversal is treated as a reduction of cost of goods sold.

(h) Investment in associates

Associates are those entities in which the Company has significant influence, but not control or joint control, over the financial and operating policies.

The equity of associates is incorporated in the financial statements using the equity method. Investments in associates are accounted for using the equity method and are recognized initially at cost. The cost of the investment includes transaction costs. The carrying amount of the investment in associates includes goodwill arising from the acquisition less any accumulated impairment losses.

The financial statements include the Company's share of the profit or loss and other comprehensive income of equity accounted investees after adjustments to align the accounting policies with those of the Company, from the date that significant influence commences until the date that significant influence ceases. When changes in an associate's equity are not recognized in profit or loss or other comprehensive income of the associate and such changes do not affect the Company's ownership percentage of the associate, the Company recognizes the changes in ownership interests of the associate in capital surplus in proportion to its ownership interests.

Gains and losses resulting from transactions between the Company and an associate are recognized only to the extent of unrelated Company' s interests in the associate.

When the Company's share of losses exceeds its interest in associates, the carrying amount of the investment, including any long-term interests that form part thereof, is reduced to zero, and the recognition of further losses is discontinued except to the extent that the Company has an obligation or has made payments on behalf of the investee.

Review and analysis of the Company's financial position and financial performance, and risk management

Special items to be included

# Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### (i) Investment in subsidiaries

When preparing the Company's financial statements, investments in subsidiaries which are controlled by the Company using the equity method. Under the equity method, the net income, other comprehensive income, and equity in the financial statements are equivalent to those attributable to the shareholders of the parent company in the parent company only financial statements.

Changes in ownership of a subsidiary that do not result in loss of control are accounted for as equity transactions. If the investment in shares is not made by cash but in exchange with providing service or other assets, the cost of the investment is determined by either the fair value of shares purchased, the fair value of the service provided, or the fair value of the assets exchanged, which ever can be determined more objectively. If the investment in subsidiary is in exchange with service to be provided in the future, the account "investment in equity method" should be credited and reversed to recognized investment income based on the timing of the service provided under a reasonable accounting system.

(j) Joint arrangement

A joint venture is a joint arrangement whereby the Company has joint control of the arrangement (i.e. joint venturers) in which the Company has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities. The Company recognizes its interest in a joint venture as an investment and accounts for that investment using the equity method in accordance with IAS 28 "Investments in Associates and Joint Ventures", unless the Company qualifies for exemption from that Standard. Please refer to note 4(i) for the application of the equity method.

The Company determines the type of joint arrangement in which it is involved by considering the structure and form of the arrangement, the separate legal vehicle, the terms agreed by the parties in the contractual arrangement and other facts and circumstances. When the facts and circumstances change, the Company reevaluates whether the classification of the joint arrangement has changed

### (k) Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs, less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

(ii) Reclassification to investment properties

Property is reclassified to investment property at its carrying amount when the use of the property changes from owner-occupied to investment property.

(iii) Subsequent cost

Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

(iv) Depreciation

Depreciation is calculated on the cost of an asset less its residual value and is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment.

Land has an unlimited useful life and therefore is not depreciated.

The estimated useful lives, for the current and comparative years, of significant items of property, plant and equipment are as follows:

| Land improvements                | 8~30 years |
|----------------------------------|------------|
| Buildings                        | 3~60 years |
| Machinery                        | 3~50 years |
| Furniture and fixtures equipment | 3~8 years  |

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### (I) Investment property

Investment property is property held either to earn rental income or for capital appreciation, or for both, but not for sale in the ordinary course of business used in the production or supply of goods or services, or for administrative purposes. Investment property is measured at cost on initial recognition, and subsequently at cost, less accumulated depreciation and accumulated impairment losses. Depreciation expense is calculated based on the depreciation method, useful life, and residual value which are the same as those adopted for property, plant and equipment.

Any gain or loss on disposal of an investment property (calculated as the difference between the net proceeds from disposal and the carrying amount) is recognized in profit or loss.

Rental income from investment property is recognized as other revenue on a straight line basis over the lease term. Lease incentives granted are recognized as an integral part of the total rental income, over the term of the lease.

# (m) Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

(i) As a leasee

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The rightof-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at, or before, the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by using the impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Company' s incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- payments for purchase or termination options that are reasonably certain to be exercised.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when:

- there is a change in future lease payments arising from the change in an index or rate; or
- there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee; or
- there is a change of its assessment of the underlying asset purchase option; or
- there is a change of its assessment on whether it will exercise a purchase, extension or termination option; or
  there is any lease modifications

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Company accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Company presents its right-of-use assets that do not meet the definition of investment and its lease liabilities as a separate line item respectively in the statement of financial position.

The Company has elected not to recognize the right-of-use assets and lease liabilities for its short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes the lease

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities payments associated with these leases as an expense on a straight-line basis over the lease term.

(ii) As a lessor

When the Company acts as a lessor, it determines, at lease commencement, whether each lease is a finance lease or an operating lease. To classify each lease, the Company makes an overall assessment of whether the lease transfers to the lessee substantially all of the risks and rewards of ownership incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then the lease is an operating lease. As part of this assessment, the Company considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

When the Company is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Company applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, the Company applies IFRS15 to allocate the consideration in the contract.

(n) Intangible assets

Intangible assets comprise computer software and industrial technology and are measured at cost less accumulated amortization and accumulated impairment losses.

Subsequent expenditure is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognized in profit or loss as incurred.

Amortization is calculated over the cost of the asset, less its residual value, and is recognized in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use.

The estimated useful lives for current and comparative periods are as follows:

(i) Computer software 3years

(ii) Industrial technology 10 years

Amortization methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(o) Impairment - non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset' s recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognized in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset' s carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(p) Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects the current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

(q) Revenue

Revenue is measured based on the consideration to which the Company expects to be entitled in exchange for transferring goods or services to a customer. The Company recognizes revenue when it satisfies a performance obligation by transferring control of a good or a service to a customer. The accounting policies for the Company' s main types of revenue are explained below.

# **Overview of financial status**

Review and analysis of the Company's financial position and financial performance, and risk management

### Special items to be included

# Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### (i) Sale of goods

The Company is mainly engaged in the manufacture and sale of various types of synthetic rubber. The Company recognizes revenue when control of the products has been transferred. When the products are delivered to the customer, the ownership of the significant risks and rewards of the products have been transferred to the customer, and the Company is no longer engaged with the management of the products. Delivery occurs being when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract and the acceptance provisions have lapsed, or the Company has objective evidence that all criteria for acceptance have been satisfied.

A receivable is recognized when the goods are delivered as this is the point in time that the Company has a right to an amount of consideration that is unconditional.

#### (ii) Management services

The Company is engaged in providing management services. Revenue from providing services is recognized in the accounting period in which the services are rendered. For fixed-price contracts, revenue is recognized based on the actual service provided at the end of the reporting period as a proportion of the total services to be provided. The proportion of services provided is determined based on surveys of work performed.

#### (iii) Financing components

The Company does not expect to have any contracts where the period between the transfer of the promised goods or services to the customer and payment by the customer exceeds one year. As a consequence, the Company does not adjust any of the transaction prices for the time value of money.

# (r) Employee benefits

(i) Defined contribution plans

Obligations for contributions to defined contribution pension plans are recognized as an employee benefit expense in profit or loss in the periods during which services are rendered by employees.

(ii) Defined benefit plans

The Company's net obligation in respect of defined benefit plans is calculated separately for each the plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognized asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any applicable minimum funding requirements.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest), are recognized immediately in other comprehensive income, and accumulated in retained earnings within equity. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the thennet defined benefit liability (asset). Net interest expense and other expenses related to defined benefit plans are recognized in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognized immediately in profit or loss. The Company recognizes gains and losses on the settlement of a defined benefit plan when the settlement occurs.

(iii) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

### (s) Government grants

The Company recognizes an other government grants related to assets are initially recognized as deferred income at fair value if there is reasonable assurance that they will be received and the Company will comply with the conditions associated with the grant; they are then recognized in profit or loss on a systematic basis over the useful life of the asset. Grants that compensate the Company for expenses or losses incurred are recognized in profit or loss on a systematic basis in the periods in which the expenses or losses are recognized.

#### (t) Income tax

Income tax expenses include both current taxes and deferred taxes. Except for expenses related to business combinations or recognized directly in equity or other comprehensive income, all current and deferred taxes shall be recognized in profit or loss.

Current taxes comprise the expected tax payables or receivables on the taxable profits (losses) for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payables or receivables are the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date.

Deferred taxes arise due to temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases. Deferred taxes shall not be recognized for the exceptions below:

- (i) Assets and liabilities that are initially recognized but are not related to the business combination and have no effect on net income or taxable gains (losses) during the transaction;
- (ii) temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- (iii) taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets and liabilities shall be measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities may be offset against each other if the following criteria are met:

- (i) The entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- (ii) the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either:
  - i. the same taxable entity; or
  - ii. different taxable entities which intend annually either to settle current tax liabilities and assets on a net basis or to realize the assets and settle the liabilities, simultaneously.

A deferred tax asset should be recognized for unused tax losses, unused tax credits, and deductible temporary differences to the extent that it is probable that future taxable profit will be available against which they can be utilized. Such deferred tax assets shall also be reviewed at each reporting date, and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

(u) Earnings per share

Earnings per share (EPS) of common stock are calculated by dividing net income (or loss) for the reporting period attributable to common stockholders by the weighted-average number of common shares outstanding during that period. The weighted-average number of common shares outstanding is adjusted retroactively for the increase in common shares outstanding from stock issuance arising from the capitalization of retained earnings, or additional paid-in capital.

If the Company may settle the obligation by cash, by issuing shares, or in combination of both cash and shares, profit sharing to employees which will be settled in shares should be included in the weighted average number of shares outstanding in calculation of diluted EPS, if the shares have a dilutive effect. The number of shares is estimated by dividing the amount of profit sharing to employees in stock by the closing price (after considering the dilutive effect of dividends) of the common shares on the balance sheet date. Such dilutive effect of the potential shares needs to be included in the calculation of diluted EPS until the shares of profit sharing to employees are resolved in the board of directors meeting in the following year. If profit sharing is resolved to be distributed to employees in stock, the number of shares is determined by dividing the amount of profit sharing by fair value, which is the closing price (after considering the effect of dividends) of the shares on the day preceding the board meeting.

#### (v) Operating segments

The Company has disclosed information about operating segments in its consolidated financial statements. Hence no further information is disclosed in the financial statements.

# <5> Significant accounting assumptions and judgments, and major sources of estimation uncertainty

The preparation of the parent company only financial statements in conformity with the Regulations by Securities Issuers requires management to make judgments, estimates, and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income, and expenses. Actual results may differ from these estimates. The Management will continually review the estimates and basic assumptions. Changes in accounting estimates will be

recognized in the period of change and the future period of their impact.

There are no critical judgments in applying the accounting policies that have a significant effect on the amounts recognized in the parent company only financial statements.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year is as follows:

(a) Inventory measurement

Since inventory is measured by the lower of cost and net realizable value, the Company evaluated the inventory based on the selling price of the product line and price fluctuation of raw material, and written down the book value to net realizable value. Please refer to note 6(f) for inventory measurement.

(b) Impairment of investments accounted for using equity method

The assessment of impairment of intangible assets requires the company to make subjective judgments to identify cash-generating units and estimate the recoverable amount of relevant cash-generating units. Any changes in these estimates based on changed economic conditions or business strategies could result in significant adjustments in future years. Refer to note 6(k) for further description of the Impairment of intangible assets.

# <6> Explanation of significant accounts

| Accounts receivable                   | 1,399,816       | 947,102   |
|                                       | 1               | 1 -       |

The Company applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected credit loss provision for all receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due, as well as incorporated forward-looking information. The loss allowance provision were determined as follows:

(n) Operating leases

The Company leases out its investment property. The Company has classified these leases as operating leases, because it does not transfer substantially all of the risks and rewards incidental to the ownership of the assets; please refer to note 6(j).

A maturity analysis of lease payments, showing the undiscounted lease payments to be received after the reporting date is as follows:

|                                   | December 31, 2021 |         | December 31, 2020 |  |
|-----------------------------------|-------------------|---------|-------------------|--|
| Less than one year                | \$                | 66,190  | 66,587            |  |
| One to two years                  |                   | 58,553  | 66,167            |  |
| Two to three years                |                   | 46,791  | 59,333            |  |
| Three to four years               |                   | 12,138  | 46,791            |  |
| Four to five years                |                   | 13,241  | 12,138            |  |
| More than five years              |                   | 42,990  | 56,232            |  |
| Total undiscounted lease payments | \$                | 239,903 | 307,248           |  |

In 2021 and 2020, the rental income from investment property amounted to \$73,422 thousand and \$64,663 thousand, respectively.

(o) Employee benefits

(i) Defined benefit plans

The following table shows a reconciliation between the present value of the defined benefit obligation and the fair value of plan assets:

|  | December 31, 2021 |           | December 31, 2020 |
|--|-------------------|-----------|-------------------|
| The present value of the defined benefit obligations | \$                | 605,909   | 606,090           |
| Fair value of plan assets                            |                   | (519,935) | (535,923)         |
| The net defined benefit liability                    | <u>\$</u>         | 85,974    | 70,167            |

The Company established the pension fund account for the defined benefit plan in Bank of Taiwan. The plan, under the Labor Standards Law, provides benefits based on an employee's length of service and average monthly salary for the six-month period prior to retirement.

1) Composition of plan assets

The Company allocates pension funds in accordance with the Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund, and such funds are managed by the Bureau of Labor Funds, ministry of Labors. Minimum annual distributions of the funds by the Bureau shall be no less than the earnings attainable from two-year time deposits with interest rates offered by local banks.

The Company's Bank of Taiwan labor pension reserve account balance amounted to \$519,935 thousand at the end of the current reporting period. For information on the utilization of the labor pension fund assets including the asset allocation and yield of the fund, please refer to the website of the Bureau of Labor Funds, Ministry of Labors.

2) Movements in present value of defined benefit obligation

The movements in present value of the Company's defined benefit obligation for the years ended December 31, 2021 and 2020 were as follows:

|  | <br>2021      | 2020     |
|--|---------------|----------|
| Defined benefit obligation as of 1 January   | \$<br>606,090 | 615,154  |
| Current service costs and interest   | 8,891         | 11,598   |
| Remeasurements of net defined benefit liability (asset)                                    |               |          |
| - Return on plan assets (excluding current interest expense)                               | 6,392         | 15,816   |
| <ul> <li>Due to changes in financial assumption of actuarial gains<br/>(losses)</li> </ul> | 31,893        | 14,247   |
| Benefits paid by the plan  | <br>(47,357)  | (50,725) |
| Defined benefit obligation as of 31 December   | \$<br>605,909 | 606,090  |

#### 3) Movements in fair value of plan assets

The movements in the fair value of the plan assets for the years ended December 31, 2021 and 2020 were as follows:

|  | 2021          | 2020            |
|--|---------------|-----------------|
| Fair value of plan assets as of January 1                    | \$<br>535,923 | 504,256         |
| Expected return  | 3,241         | 4,867           |
| Remeasurements of net defined benefit liability (asset)      |               |                 |
| - Return on plan assets (excluding current interest expense) | 6,392         | 15,816          |
| Contributions made   | 21,736        | 61,709          |
| Benefits paid by the plan                                    | <br>(47,357)  | <u>(50,725)</u> |
| Fair value of plan assets as of December 31                  | \$<br>519,935 | 535,923         |

4) Expenses recognized in profit or loss

The expenses recognized on profit or loss for the years ended December 31, 2021 and 2020 were as follows:

|   | <br>2021    | 2020  |
|---|-------------|-------|
| Current service cost                                  | \$<br>5,226 | 5,645 |
| Net interest on the defined benefit liability (asset) | <br>424     | 1,086 |
|   | \$<br>5,650 | 6,731 |

|                           | 2  | 2021  | 2020  |  |
|---------------------------|----|-------|-------|--|
| Operating costs           | \$ | 3,402 | 4,008 |  |
| Operating expenses        |    | 1,972 | 2,328 |  |
| Other income and expenses |    | 276   | 290   |  |
| Other receivables         |    |       | 105   |  |
|                           | \$ | 5,650 | 6,731 |  |

#### 5) Actuarial assumptions

The following are the Company's principal actuarial assumptions at the reporting dates:

|                              | December 31, 2021 | December 31, 2020 |
|------------------------------|-------------------|-------------------|
| Discount rate                | 0.500%            | 0.625%            |
| Future salary increases rate | 1.500%            | 1.500%            |

The Company expects to make contributions of \$18,773 thousand to the defined benefit plans in the next year starting from the reporting date of 2021.

The weighted average duration of the defined benefit plan is 9.69 years for the year ended December 31, 2021.

6) Sensitivity analysis

When calculating the present value of the defined benefit obligation, the Company uses judgments and estimations to determine the related actuarial assumptions, including discount rates, employee turnover rates and future salary changes, as of balance sheet date. Any changes in the actuarial assumptions may significantly impact the amount of the defined benefit obligation.

# Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities As of December 31, 2021 and 2020, the effects on the present value of the defined benefit obligation arising from changes in principle actuarial assumptions were as follows:

|                             | Effec  | Effects on defined benefit obligation |          |  |  |
|-----------------------------|--------|---------------------------------------|----------|--|--|
|                             | Increa | Increase 0.25%                        |          |  |  |
| December 31, 2021           |        |                                       |          |  |  |
| Discount rate               | \$     | (11,357)                              | 11,661   |  |  |
| Future salary increase rate |        | 11,132                                | (10,893) |  |  |
| December 31, 2020           |        |                                       |          |  |  |
| Discount rate               |        | (11,785)                              | 12,142   |  |  |
| Future salary increase rate |        | 11,608                                | (11,330) |  |  |

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions remain constant, would have affected the defined benefit obligation by the amounts shown above. The method used in the sensitivity analysis is consistent with the calculation of the pension liabilities in the balance sheets.

The method and assumptions used on current sensitivity analysis are the same as those of the prior year.

# (ii) Defined contribution plans

The Company has made monthly contributions equal to 6% of each employee's monthly wages to the labor pension personal account at the Bureau of Labor Insurance in accordance with the provisions of the Labor Pension Act. Under this defined contribution plan, the Company contributes a fixed amount to the Bureau of Labor Insurance without additional legal or constructive obligations.

The Company's pension costs under the defined contribution plan were \$27,619 thousand and \$26,818 thousand for the years 2021 and 2020, respectively. Payments were made to the Bureau of Labor Insurance.

(iii) Short-term employee benefit liabilities

|                                 |           | December 31, 2021 | December 31, 2020 |
|---------------------------------|-----------|-------------------|-------------------|
| Compensated absence liabilities | <u>\$</u> | 29,339            | 28,541            |
|                                 |           |                   |                   |

(p) Income tax

(i) Income tax expenses

The amounts of the Company's income tax expenses for the years ended December 31, 2021 and 2020 were as follows:

|   | <br>2021      | 2020    |
|---|---------------|---------|
| Current income tax expense                        |               |         |
| Current period                                    | \$<br>256,034 | 50,470  |
| Adjustment for prior periods                      | <br>50        | 7,106   |
|   | <br>256,084   | 57,576  |
| Deferred tax expense                              |               |         |
| Origination and reversal of temporary differences | 237,883       | 31,752  |
| Change in unrecognized temporary differences      | <br>(83,695)  | 14,419  |
|   | <br>154,188   | 46,171  |
| Income tax expenses of continued operations       | \$<br>410,272 | 103,747 |

The amounts of the Company's income tax expenses recognized under other comprehensive income for the years ended December 31, 2021 and 2020 were as follows:

|   | 2021   | 2020 |
|---|--------|------|
| Items that will not be reclassified subsequently to profit or loss: |        |      |
| Unrealized gains (losses) on equity instruments at fair value       | 21,345 | -    |
| through other comprehensive income                                  |        |      |

(ii) Recognized deferred tax assets and liabilities

1) Unrecognized deferred tax liabilities

The Company is able to control the timing of the reversal of the temporary differences associated with investments in subsidiaries as of December 31, 2021. Also, management considers it probable that the temporary differences will not reverse in the foreseeable future. Hence, such temporary differences are not recognized under deferred tax liabilities. Details are as follows:

December 31, 2021

1,227,164

245,433

Aggregate amount of temporary differences related to investments in subsidiaries Unrecognized deferred tax liabilities

2) Unrecognized deferred tax assets

The Company's deferred tax assets have not been recognized in respect of the following items:

|                                       | December 31, 2021 | December 31, 2020 |
|---------------------------------------|-------------------|-------------------|
| The carryforward of unused tax losses | <u> </u>          | 83,695            |

Under the income tax rate, tax losses can be carried forward for ten years to offset taxable income. Deferred income tax assets have not been recognized in respect of these items because it is not probable that the future taxable profit will be available, against which, the Company can utilize the benefits therefrom.

As of December 31, 2021, the Company didn't have any unrecognized deferred tax assets for taxable losses. 3) Recognized deferred income tax assets and liabilities

Changes in the amount of deferred tax assets and liabilities for 2021 and 2020 were as follows: Deferred tax assets:

|                              | fined ben-<br>fit plans | Allowance<br>for inventory<br>valuation | Loss carry-<br>forward | Others   | Total    |

(iii) Assessed of tax

The tax returns of the Company have been assessed by the tax authorities through 2019.

(q) Capital and other equity

#### (i) Capital

In accordance with the Company's articles of incorporation, the capital share of the company amounted to \$12,000,000 thousand, divided into 1,200,000,000 shares, at NT\$10 per share.

As of December 31, 2021 and 2020, 825,709,978 shares of ordinary were issued.

(ii) Additional paid-in capital

The components of additional paid-in capital, were as follows:

|                                |    | December 31, 2021 | December 31, 2020 |  |
|--------------------------------|----|-------------------|-------------------|--|
| Share premium                  | \$ | 849               | 849               |  |
| Over-aging unclaimed dividends | _  | 49,876            | 48,682            |  |
|                                | \$ | 50,725            | 49,531            |  |

In accordance with the ROC Company Act, realized capital surplus can be used to increase share capital or to distribute as cash dividends after offsetting losses. The aforementioned capital surplus includes share premiums and donation gains. In accordance with the Regulations Governing the Offering and Issuance of Securities by Securities Issuers, the amount of capital surplus to increase share capital shall not exceed 10 percent of the actual share capital amount.

#### (iii) Retained earnings

1) Legal reserve

The ROC Company Act stipulates that companies must retain 10% of their annual net earnings, as defined in the Act, until such retention equals the amount of issued share capital. When a company incurs no loss, it may, pursuant to a resolution to be adopted by the shareholders' meeting as required, distribute its legal reserve by issuing new shares or cash. Only the portion of legal reserve which exceeds 25% of the issued share capital may be distributed. In accordance with Rule No. 10802432410 issued by Ministry of Economic Affairs, R.O.C on January 9, 2020, the Company has to apply the profit distribution based on its financial statement in 2020, wherein the Company shall use the amount of net profit after tax, plus, those net amounts other than the net profits, which are recognized as undistributed surplus earnings, as the basis for the legal reserve.

2) Special earnings reserve

By choosing to apply exemptions granted under IFRS 1 First-time Adoption of International Financial Reporting Standards during the Company's first-time adoption of the IFRSs endorsed by the FSC, unrealized revaluation increments and cumulative translation adjustments (gains) under shareholders' equity were reclassified to retained earnings at the adoption date. An increase in retained earnings due to the first-time adoption of the IFRSs endorsed by the FSC shall be reclassified as a special earnings reserve during earnings distribution. However, when adjusted retained earnings due to the first-time adoption of the IFRSs endorsed by the FSC are insufficient for the appropriation of a special earnings reserve at the transition date, the Company may appropriate a special earnings reserve up to the amount of increase in retained earnings reserve proportionately. As a result of elections made according to IFRS 1, the Company has reclassified \$(103,035) thousand to retained earnings and is not required to appropriate a special earnings reserve.

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities A portion of current-period earnings and undistributed prior-period earnings shall be reclassified as a special earnings reserve during earnings distribution. The amount to be reclassified should be equal to the difference between the total net current-period reduction of special earnings reserve resulting from the first-time adoption of IFRSs and the carrying amount of other shareholders' equity as stated above. Similarly, a portion of undistributed prior-period earnings shall be reclassified as a special earnings reserve (which does not qualify for earnings distribution) to account for cumulative changes to other shareholders' equity pertaining to prior periods due to the first-time adoption of IFRSs. Amounts of subsequent reversals pertaining to the net reduction of other shareholders' equity shall qualify for additional distributions.

3) Distribution of retained earnings

In accordance with the Company's articles of incorporation amended on June 19, 2020, when allocating the earnings for each fiscal year, the Company may, after offsetting losses from previous years, and paying taxes, and setting aside any statutory and appropriated retained earnings of 10% by ordinary resolution, allocate the remaining balance dividends, retained earnings or otherwise. The allocation shall be proposed by the Board of Directors for a resolution at the shareholders' general meeting. However, dividends issued in cash may be approved by the Board of Directors with more than two thirds of the directors' attendance, and be resolved by more than half of the directors, thereafter, to be reported during the shareholders' general meeting.

In accordance with the original Company's articles of incorporation, if the Company incur profit for the year, the profit should first be used to pay taxes, then offset the previous year's deficit; thereafter, 10% of the remainder will be reserved as special surplus, which can be increased or reversed based on the Securities and Exchange Act. Any remaining balances, together with the previous year's undistributed retained earnings, will be deemed as distributable.

For the distribution based on the above of paragraph, the cash dividend shall not be less than 20% of the total distribution.

The above mentioned distribution of surplus shall be decided by the Board of Directors; thereafter, to be submitted to the shareholders' meeting for approval.

The distribution of 2020 and 2019 earnings as dividends to stockholders that were approved by the Company's shareholders' general meetings on August 4, 2021 and June 19, 2020, respectively, were as follows:

|  | 2020               |      |              | 203                    | 19           |

Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities For the years ended December 31, 2021 and 2020, the Company recognized the employees' compensation of \$171,609 thousand and \$40,750 thousand, respectively, and the directors' remuneration of \$22,677 thousand and \$616 thousand, respectively. The amounts were estimated based on the profit-sharing percentages set by the Articles of Incorporation and were recorded as operating cost or operating expenses in the respective periods. Related information would be available at the Market Observation Post System website. There were no differences between the amounts distributed by the Board of Directors and the estimated amounts in the Company's financial reports for the years of 2021 and 2020.

| Less: Adjustment of reclassification included in profit or loss | <br>(24,896) | (28,787) |
| Net gains (losses) recognized in other comprehensive income     | \$<br>54,272 | (593)    |

(x) Financial instruments

(i) Credit risk

1) Credit risk exposure

The maximum credit risk exposure of the Company's financial assets is equal to their carrying amount. As of December 31, 2021 and 2020, the maximum credit risk exposure amounted to \$3,181,838 thousand and \$2,143,945 thousand, respectively.

2) Concentration of credit risk

The Company's cash and cash equivalents and accounts receivable are the main source of potential credit risk. The Company deposits its cash and cash equivalents in different financial institutions and has no concentration of credit risk on an individual customer. Therefore, the Company concluded that it is not exposed to credit risk. The Company guarantees bank loans for investees. The Company concluded that it is not exposed to credit risk for these transactions.

| CNY                    | \$              | 10,992                      | 4.3813        | 48,159    |
| Financial liabilities: |                 |                             |               |           |
| Monetary liabilities:  |                 |                             |               |           |
| USD                    | \$              | 45,110                      | 28.5080       | 1,285,996 |
| EUR                    | \$              | 1,455                       | 35.0563       | 51,007    |

2) Sensitivity analysis

The Company's exposure to foreign currency risk arose from cash and cash equivalents, accounts and other receivables, loans and borrowings, and accounts and other payables that were denominated in foreign currencies. If the NTD against the foreign currency had depreciated / appreciated by 1% and all the factors are remaining unchanged. The Company's net income before tax would have increased / decreased by \$198 thousand for the year ended December 31, 2021, the Company's net income before tax would have decreased / increased by \$2,323 thousand for the year ended December 31, 2020, respectively, with all other variable factors remaining constant, the analysis was performed on the same basis for both periods.

3) Foreign exchange gain and loss on monetary item

The amount, expressed in functional currency, of foreign exchange gain and loss (including realized and unrealized portion) of the Company's monetary items, and the exchange rate used to translate the original amount to the Company's functional currency. NTD (also the expressed currency), were as follows:

| to the company | a the company's functional carrency, first (also the expressed carrency), were as follows. |                        |                          |                                 |                          |  |  |  |

### (iv) Interest rate risk analysis

Please refer to the note on liquidity risk management for the interest rate exposure of the Company's financial assets and liabilities.

The following sensitivity analysis is based at the risk exposure to interest rates of the non-derivative financial instruments on the reporting date. For floating-rate instruments, the sensitivity analysis assumes the floating-rate liabilities as of the reporting date are outstanding for the whole year.

If the interest rate had increased / decreased by 1%, the Company's net income before tax would have decreased / increased by \$47,007 thousand and \$61,205 thousand for the years ended December 31, 2021 and 2020, respectively, with all other variable factors remaining constant. This is mainly due to the Company's borrowing at floating rates.

# (v) Fair value

### 1) Categories and fair value of financial instruments

Except for the followings, carrying amount of the Company's financial assets and liabilities are valuated approximately to their fair value, and are not based on observable market data and the value measurements which are not reliable. No additional fair value disclosure is required in accordance to the regulations.

|  | December 31, 2021 |            |                   |         |                |           |

| Financial liabilities at fair value through profit or loss             |                   |            |                   |         |                |           |

2) Valuation techniques and assumptions used in fair value determination

Derivative financial liabilities

If the financial instruments held by the Company have the quoted market price in active market, the fair value of the assets is based on the quoted market price. However, if the instruments have no quoted market price in active market, the Company uses market comparison approach to evaluate the fair value. The main assumption is based on the investee' s earnings after tax and the listed (over the counter) company' s earnings used in computing the market price. The estimated price has been discounted due to the price of the securities lacks the liquidity. Forward Exchange Contracts are normally priced based on the exchange rates provided by the World Agencies.

4) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement Quantified information of significant unobservable inputs was as follows:

| Item  |                            | Significant unobservable<br>inputs   | Inter-relationship be-<br>tween significant unob-<br>servable inputs and fair<br>value measurement  |
|---|----------------------------|--|---|
| Financial assets at fair<br>value through other com-<br>prehensive income - eq-<br>uity investments without<br>an active market | Comparative listed company | <ul> <li>Multipliers of price-<br/>to-earnings ratios<br/>as of December 31,<br/>2021 and 2020 were<br/>9.45~20.31 and<br/>15.62~17.8, respec-<br/>tively</li> <li>Multipliers of equity<br/>ratios as of December<br/>31, 2020 were 1.38</li> <li>Market liquidity<br/>discount rate as of<br/>December 31, 2021<br/>and 2020 was both<br/>20%</li> </ul> | <ul> <li>the estimated fair value would have been higher if the price-to-earnings and market-to-book ratios would be higher.</li> <li>the estimated fair value would have been higher if the market liquidity discount would be lower.</li> </ul> |

Since Evergreen Steel Corporation was listed in April 2021, its fair value measurement was transferred from the level 3 to level 1.

5) Fair value measurements in Level 3 - sensitivity analysis of reasonably possible alternative assumptions For fair value measurements in Level 3, changing one or more of the assumptions would have the following effects on profit or loss and other comprehensive income: . . .

|   |                                |             |           | rehensive in-<br>me |
|---|--------------------------------|-------------|-----------|---------------------|
|   | Input                          | Assumptions | Favorable | <u>Unfavorable</u>  |
| December 31, 2021   |                                |             |           |                     |
| Financial assets fair value through other compre-<br>hensive income |                                |             |           |                     |
| Equity investments without an active market                         | Liquidity dis-<br>count at 20% | 1%          | \$ 6,905  | (6,905)             |
| December 31, 2020   |                                |             |           |                     |
| Financial assets fair value through other compre-<br>hensive income |                                |             |           |                     |
| Equity investments without an active market                         | Liquidity dis-<br>count at 20% | 1%          | 10,482    | (10,482)            |

**.**...

The favorable and unfavorable effects represent the changes in fair value, and the fair value is based on a variety of unobservable inputs calculated using a valuation technique. The analysis above only reflects the effects of changes in a single input, and it does not include the interrelationships with another input.

#### (y) Financial risk management

### (i) Overview

The Company is exposed to the following risks arising from financial instruments:

- 1) Credit risk
- 2) Liquidity risk
- 3) Market risk

This note discloses information about the Company's exposure to the aforementioned risks, and its goals, policies, and procedures regarding the measurement and management of these risks. For additional quantitative disclosures of these risks, please refer to the notes regarding each risk disclosed throughout the financial report.

(ii) Risk management framework

The Company's finance department is responsible for the establishment and management of the Company's risk management framework and policies. It is overseen by and reports to management, the Audit Committee, and the Board of Directors regarding the framework's operations.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's Audit Committee oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company's Audit Committee is assisted in its oversight role by Internal Audit, which undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

(iii) Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment securities.

1) Trade and other receivables

The Company's exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the demographics of the Company's customer base, including the default risk of the industry and country in which customers operate, as these factors may have an influence on credit risk, particularly during deteriorating economic circumstances. In 2021 and 2020, there was no geographical concentration of credit risk regarding the Company's revenue.

The sales department and the finance department of the Company has established a credit policy under which each new customer is analyzed individually for creditworthiness before the Company's standard payment and delivery terms and conditions are offered. The Company's review includes the history of transactions with the counter-party, its financial position, and geographic considerations. Purchase limits are established for each customer, which represent the maximum open amount without requiring approval; these limits are reviewed on a periodic basis. Customers that fail to meet the Company's benchmark creditworthiness may transact with the Company only on a prepayment basis.

Goods are sold subject to a retention of title clause so that in the event of non-payment, the Company may have a secured claim. The Company otherwise does not require collateral in respect of trade and other receivables.

The Company has established an allowance for doubtful accounts to reflect its actual and estimated potential losses resulting from uncollectible accounts and trade receivables. The allowance for doubtful accounts consists primarily of specific losses regarding individual customers and estimates of potential losses based on the use of lifetime expected credit loss provision.

2) Investments

The credit risk exposure in the bank deposits and other financial instruments is measured and monitored by the Company's finance department. Since those who transact with the Company are banks and other external parties with good credit standing, financial institutions with a credit rating above investment grade, and government agencies, there are no non-compliance issues. With regard to investment in a financial institution with a credit rating above investment grade, an investment limit is set according to the long-term credit rating. Hence, there is no significant credit risk.

**Table of Contents** 

Letter to the Shareholders

Company profile

Corporate governance report

Overview of business operations

# **Overview of financial status**

Review and analysis of the Company's financial position and financial performance, and risk management

# Special items to be included

# Other disclosures

Any circumstances referred to in Paragraph 3(2) of Article 36 of the Securities and Exchange Act which might materially affect shareholders' equity or the price of the Company's securities

#### 3) Guarantees

The Company's policy allows it to provide financial guarantees to business partners or to related parties and jointly controlled entities according to its percentage ownership in these entities. Financial guarantees provided to subsidiaries, associates, and jointly controlled entities by the Company as of December 31, 2021 and 2020, are disclosed in note 7 "Related-party Transactions."

### (iv) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it always has sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company also monitors the level of expected cash outflows on trade and other payables. This excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

(v) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates, and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters.

1) Currency risk

The Company is exposed to currency risk on sales, purchases and borrowings that are denominated in a currency other than the respective functional currency of the Company. The currencies used in these transactions are USD, EUR, JPY and CNY.

Foreign exchange gains and losses resulting from account and trade receivables held by the Company in a currency other than the respective functional currencies are used to offset foreign exchange gains and losses resulting from short-term loans denominated in a foreign currency. Hence, the Company's risk exposure to foreign exchange risk is reduced.

Interest expenses are denominated in the same currency as that of the principal. Generally, the currency of loans matches that of the Company's operating cash flow, primarily NTD and USD.

With regard to monetary assets and liabilities denominated in a foreign currency, when a short-term risk exposure exists, the Company relies on immediate foreign exchange transactions to ensure the net exposure to foreign exchange risk is maintained at an acceptable level.

The Company does not hedge against investments in subsidiaries.

2) Interest rate risk

The interest rates of the Company's long-term and short-term borrowings are floating. Hence, changes in market conditions will cause fluctuations in the effective interest rate of the aforementioned loans. The Company's finance department monitors and measures potential changes in market conditions, entering into interest rate swaps to achieve a fixed interest rate on the Company's loans.

3) Other market price risk

The Company does not enter into any commodity contracts other than to meet the Company's expected usage and sales requirements; such contracts are not settled on a net basis.

(z) Capital management

The Company goal of capital management is to ensure the Company's continuing operating capacity, and to continuously provide remuneration to the shareholders and benefits to other equity holders. To ensure that the above-mentioned goal is achieved, the Company's management reviews its capital structure periodically. In consideration of the overall economic situation, financing cost and sufficiency of cash in-flows generated by operating activities, the Company will adjust its capital structure by paying dividends, issuing new stock, purchasing treasury stock, increasing or decreasing loans, and issuing or purchasing bonds.

The Company's capital structure at the end of the reporting period were as follows:

|                   | D         | December 31, 2021 | December 31, 2020 |
|-------------------|-----------|-------------------|-------------------|
| Total liabilities | \$        | 7,419,630         | 8,236,203         |

Note1 : Salary includes base salary, overtime pay, performance bonus, year-end bonus and pay in lieu of untaken annual leave, etc.

Note2 : Pension expenses excluded expenses for employees on international assignments amounting to \$1,553 thousand and \$1,649 thousand for the years ended December 31, 2021 and 2020, respectively.

Note3 : Other employee benefit includes meal expenses, employee welfare, training fees and employee compensation.

Note4 : Depreciation expenses excluded expenses for investment property recognized under other income and expenses, amounting to \$14,725 thousand and \$14,726 thousand for the years ended December 31, 2021 and 2020, respectively.

The Company's number of employees for the years ended December 31, 2021 and 2020 and additional information on employee benefits are as follows :

|   | <br>2021    | 2020  |
|---|-------------|-------|
| Number of employees                                       | 678         | 690   |
| Number of directors who were not employees                | 6           | 6     |
| The average employee benefit                              | \$<br>1,583 | 1,253 |
| The average salaries and wages                            | \$<br>1,057 | 996   |
| The average of employee salary cost adjustment as follows | <br>6.12%   |       |
| Supervisor remuneration                                   | \$<br>      |       |

The Company's salary and remuneration policy (including directors, managers and employees) are as follows:

(a) Directors' remuneration: The remuneration of the directors of the Company is in accordance with the Articles of Incorporation. The remuneration of directors is determined by the Board of Directors based on the directors' participation and contribution to the Company's operations, and also with reference to the level of the industry; directors' remuneration is allocated 1% based on the Company's profitability. The following is approved by the board of directors. (b) Managers and employees' remuneration: Base on the market competitive salary levels as well as the reference to the same industry and the overall operating performance, individual performance, and comprehensive contribution considerations, etc., to set the payment principal, then the Company would base on the sales representative responsibility regulations to review and approved.

#### (ii) Limitation on investment in Mainland China:

| Accumulated investment amount    | Investment (amount) approved by       | Maximum investment amount set    |
|----------------------------------|---------------------------------------|----------------------------------|
| in Mainland China as of December | Investment Commission, Ministry       | by Investment Commission, Minis- |
| 31, 2021                         | of Economic Affairs                   | try of Economic Affairs          |
| 467,961<br>(USD16,900)           | 5,187,306<br>(USD187,335)<br>(Note 2) |                                  |

Note 1: In accordance with the "Regulations on Permission for Investment or Technical Cooperation in Mainland China" and the "Principles for Examination of Applications for Investment or Technical Cooperation in Mainland China" amended and ratified by the Executive Yuan on August 22, 2008, the Company met the criteria for operational headquarters under the Statute for Industrial Innovation and obtained approval from the Industrial Development Bureau, Ministry of Economic Affairs, on August 18, 2021. As it has an operational headquarters status, the Company is not subject to the limitation as to the amount of investment in Mainland China during the period from August 12, 2021 to August 11, 2024. Note 2: This amount includes capital increase out of earnings, approved by the Investment Commission, MOEA.

Note 3: Amounts in foreign currencies were translated based on the exchange rate at the reporting date (USD1 to NTD27.690).

### (iii) Significant transactions

1) Sales and accounts receivable

Sales to related parties in Mainland China are summarized as follows:

|                                 | 2021          |
|---------------------------------|---------------|
| TSRC (Shanghai) Industries Ltd. | \$<br>8,450   |
| TSRC (Nantong) Industries Ltd.  | <br>99,524    |
|                                 | \$<br>107,974 |

The related accounts receivable resulting from the above transactions as of December 31, 2021 are as follows:

2021

|                                 | Decem | ber 31, 2021 |
|---------------------------------|-------|--------------|
| TSRC (Shanghai) Industries Ltd. | \$    | 2,846        |
| TSRC (Nantong) Industries Ltd.  |       | 20,791       |
|                                 | \$    | 23,637       |

There were no significant differences between the pricing of sales transactions with related parties and that with other customers. The payment terms ranged from two to three months, which were similar to those given to other customers.

2) Purchases and accounts payable

TSRC (Nantong) Industries Ltd.

Purchase from related parties in Mainland China are summarized as follows:

|                                | <br>2021     |
|--------------------------------|--------------|
| TSRC (Nantong) Industries Ltd. | \$<br>33,624 |
|                                |              |

The related accounts payable resulting from the above transactions as of December 31, 2021 are as follows:

| <br>December 31, 2021 |  |  |  |  |
|-----------------------|--|--|--|--|
| \$<br>8,134           |  |  |  |  |

2021

There were no significant differences between the pricing of purchases transactions with related parties and that with other suppliers. The payment terms ranged from one to two months, which were similar to other suppliers.

3) Service income
